

Respondents; no other party requested a review.

On May 14, 2012, the Petitioners withdrew their request for an administrative review of the Respondents.

Rescission of Review

Pursuant to 19 CFR 351.213(d)(1) of the Department's regulations, the Department will rescind an administrative review if the party that requested the review withdraws its request for review within 90 days of the publication of the notice of initiation of the requested review, or withdraws at a later date if the Department exercises its discretion to extend the time limit for withdrawing the request. The Petitioners withdrew their request within the 90-day deadline. Therefore, we are rescinding the review with respect to all companies.

Assessment

The Department will instruct U.S. Customs and Border Protection (CBP) to assess antidumping duties on all appropriate entries. Antidumping duties shall be assessed at rates equal to the cash deposit of estimated antidumping duties required at the time of entry or withdrawal from warehouse, for consumption, in accordance with 19 CFR 351.212(c)(1)(i). The Department intends to issue appropriate assessment instructions directly to CBP 15 days after publication of this notice.

Notifications

This notice serves as a final reminder to importers for whom this review is being rescinded of their responsibility under 19 CFR 351.402(f)(2) to file a certificate regarding the reimbursement of antidumping duties prior to liquidation of the relevant entries during this review period. Failure to comply with this requirement could result in the Secretary's presumption that reimbursement of the antidumping duties occurred and the subsequent assessment of double antidumping duties.

This notice also serves as a reminder to parties subject to administrative protective orders (APO) of their responsibility concerning the return or destruction of proprietary information disclosed under APO in accordance with 19 CFR 351.305, which continues to govern business proprietary information in this segment of the proceeding. Timely written notification of the return/destruction of APO materials or conversion to judicial protective order is hereby requested. Failure to comply with the regulations

and terms of an APO is a violation which is subject to sanction.

This notice is issued and published in accordance with section 777(i)(1) of the Tariff Act of 1930, as amended, and 19 CFR 351.213(d)(4).

Dated: June 5, 2012.

Christian Marsh,

Deputy Assistant Secretary for Antidumping and Countervailing Duty Operations.

BILLING CODE 3510-DS-P

DEPARTMENT OF COMMERCE

International Trade Administration

[A-588-854]

Certain Tin Mill Products From Japan: Continuation of Antidumping Duty Order

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

SUMMARY: As a result of the determinations by the Department of Commerce (the Department) and the U.S. International Trade Commission (USITC) that revocation of the antidumping duty order on certain tin mill products from Japan would likely lead to continuation or recurrence of dumping and material injury to an industry in the United States, the Department is publishing a notice of continuation of this antidumping duty order.

DATES: *Effective Date:* June 12, 2012.

FOR FURTHER INFORMATION CONTACT: David Cordell or Angelica Mendoza, AD/CVD Operations Office 7, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue NW., Washington, DC 20230; telephone: (202) 482-0408 and (202) 482-3019, respectively.

SUPPLEMENTARY INFORMATION:

Background

On August 28, 2000, the Department published the antidumping duty order on certain tin mill products from Japan.¹ On June 1, 2011, the Department initiated the second sunset review of the antidumping duty order on certain tin mill products from Japan pursuant to section 751(c) of the Tariff Act of 1930, as amended (the Act).²

As a result of this sunset review, the Department determined that revocation

¹ See *Certain Tin Mill Products from Japan: Notice of Antidumping Duty Order*, 65 FR 52067 (August 28, 2000).

² See *Initiation of Five-Year "Sunset" Review*, 76 FR 31588, 31589 (June 1, 2011).

of the antidumping duty order on certain tin mill products from Japan would likely lead to continuation or recurrence of dumping and, therefore, notified the USITC of the magnitude of the margins of dumping likely to prevail should the order be revoked.³

On June 4, 2012, the USITC published its determination, pursuant to section 751(c) of the Act, that revocation of the antidumping duty order on certain tin mill products from Japan would be likely to lead to continuation or recurrence of material injury to an industry in the United States within a reasonably foreseeable time.⁴

Scope of the Order

The products covered by the antidumping duty order are tin mill flat-rolled products that are coated or plated with tin, chromium or chromium oxides. Flat-rolled steel products coated with tin are known as tin plate. Flat-rolled steel products coated with chromium or chromium oxides are known as tin-free steel or electrolytic chromium-coated steel. The scope includes all the noted tin mill products regardless of thickness, width, form (in coils or cut sheets), coating type (electrolytic or otherwise), edge (trimmed, untrimmed or further processed, such as scroll cut), coating thickness, surface finish, temper, coating metal (tin, chromium, chromium oxide), reduction (single- or double-reduced), and whether or not coated with a plastic material. All products that meet the written physical description are within the scope of the order unless specifically excluded. The following products, by way of example, are outside and/or specifically excluded from the scope of the order:

■ Single reduced electrolytically chromium coated steel with a thickness 0.238 mm (85 pound base box) ($\pm 10\%$) or 0.251 mm (90 pound base box) ($\pm 10\%$) or 0.255 mm ($\pm 10\%$) with 770 mm (minimum width) (± 1.588 mm) by 900 mm (maximum length if sheared) sheet size or 30.6875 inches (minimum width) ($\pm \frac{1}{16}$ inch) and 35.4 inches (maximum length if sheared) sheet size; with type MR or higher (per ASTM) A623 steel chemistry; batch annealed at T2 $\frac{1}{2}$ anneal temper, with a yield strength of 31 to 42 kpsi (214 to 290

³ See *Certain Tin Mill Products from Japan; Final Results of the Second Expedited Sunset Review of the Antidumping Duty Order*, 76 FR 60001 (September 28, 2011) and accompanying Issues and Decision Memorandum.

⁴ See *Tin- and Chromium-Coated Steel Sheet from Japan Investigation No. 731-TA-860 (Second Review)*, 77 FR 32998 (June 4, 2012), and USITC Publication 4325 (May 2012), titled *Tin- and Chromium-Coated Steel Sheet from Japan Investigation No. 731-TA-860 (Second Review)*.

Mpa); with a tensile strength of 43 to 58 kpsi (296 to 400 Mpa); with a chrome coating restricted to 32 to 150 mg/m²; with a chrome oxide coating restricted to 6 to 25 mg/m² with a modified 7B ground roll finish or blasted roll finish; with roughness average (Ra) 0.10 to 0.35 micrometers, measured with a stylus instrument with a stylus radius of 2 to 5 microns, a trace length of 5.6 mm, and a cut-off of 0.8 mm, and the measurement traces shall be made perpendicular to the rolling direction; with an oil level of 0.17 to 0.37 grams/base box as type BSO, or 2.5 to 5.5 mg/m² as type DOS, or 3.5 to 6.5 mg/m² as type ATBC; with electrical conductivity of static probe voltage drop of 0.46 volts drop maximum, and with electrical conductivity degradation to 0.70 volts drop maximum after stoving (heating to 400 degrees F for 100 minutes followed by a cool to room temperature).

■ Single reduced electrolytically chromium-or tin-coated steel in the gauges of 0.0040 inch nominal, 0.0045 inch nominal, 0.0050 inch nominal, 0.0061 inch nominal (55 pound base box weight), 0.0066 inch nominal (60 pound base box weight), and 0.0072 inch nominal (65 pound base box weight), regardless of width, temper, finish, coating or other properties.

■ Single reduced electrolytically chromium coated steel in the gauge of 0.024 inch, with widths of 27.0 inches or 31.5 inches, and with T-1 temper properties.

■ Single reduced electrolytically chromium coated steel, with a chemical composition of 0.005% max carbon, 0.030% max silicon, 0.25% max manganese, 0.025% max phosphorous, 0.025% max sulfur, 0.070% max aluminum, and the balance iron, with a metallic chromium layer of 70–130 mg/m², with a chromium oxide layer of 5–30 mg/m², with a tensile strength of 260–440 N/mm², with an elongation of 28–48%, with a hardness (HR-30T) of 40–58, with a surface roughness of 0.5–1.5 microns Ra, with magnetic properties of Bm (KG) 10.0 minimum, Br (KG) 8.0 minimum, Hc (Oe) 2.5–3.8, and MU 1400 minimum, as measured with a Riken Denshi DC magnetic characteristic measuring machine, Model BHU-60.

■ Bright finish tin-coated sheet with a thickness equal to or exceeding 0.0299 inch, coated to thickness of ¾ pound (0.000045 inch) and 1 pound (0.00006 inch).

■ Electrolytically chromium coated steel having ultra flat shape defined as oil can maximum depth of 5/64 inch (2.0 mm) and edge wave maximum of 5/64 inch (2.0 mm) and no wave to penetrate more than 2.0 inches (51.0 mm) from

the strip edge and coilset or curling requirements of average maximum of 5/64 inch (2.0 mm) (based on six readings, three across each cut edge of a 24 inches (61 cm) long sample with no single reading exceeding 4/32 inch (3.2 mm) and no more than two readings at 4/32 inch (3.2 mm)) and (for 85 pound base box item only: crossbuckle maximums of 0.001 inch (0.0025 mm) average having no reading above 0.005 inch (0.127 mm)), with a camber maximum of 1/4 inch (6.3 mm) per 20 feet (6.1 meters), capable of being bent 120 degrees on a 0.002 inch radius without cracking, with a chromium coating weight of metallic chromium at 100 mg/m² and chromium oxide of 10 mg/m², with a chemistry of 0.13% maximum carbon, 0.60% maximum manganese, 0.15% maximum silicon, 0.20% maximum copper, 0.04% maximum phosphorous, 0.05% maximum sulfur, and 0.20% maximum aluminum, with a surface finish of Stone Finish 7C, with a DOS-A oil at an aim level of 2 mg/square meter, with not more than 15 inclusions/foreign matter in 15 feet (4.6 meters) (with inclusions not to exceed 1/32 inch (0.8 mm) in width and 3/64 inch (1.2 mm) in length), with thickness/temper combinations of either 60 pound base box (0.0066 inch) double reduced CADR8 temper in widths of 25.00 inches, 27.00 inches, 27.50 inches, 28.00 inches, 28.25 inches, 28.50 inches, 29.50 inches, 29.75 inches, 30.25 inches, 31.00 inches, 32.75 inches, 33.75 inches, 35.75 inches, 36.25 inches, 39.00 inches, or 43.00 inches, or 85 pound base box (0.0094 inch) single reduced CAT4 temper in widths of 25.00 inches, 27.00 inches, 28.00 inches, 30.00 inches, 33.00 inches, 33.75 inches, 35.75 inches, 36.25 inches, or 43.00 inches, with width tolerance of #1/8 inch, with a thickness tolerance of #0.0005 inch, with a maximum coil weight of 20,000 pounds (9071.0 kg), with a minimum coil weight of 18,000 pounds (8164.8 kg) with a coil inside diameter of 16 inches (40.64 cm) with a steel core, with a coil maximum outside diameter of 59.5 inches (151.13 cm), with a maximum of one weld (identified with a paper flag) per coil, with a surface free of scratches, holes, and rust.

■ Electrolytically tin coated steel having differential coating with 1.00 pound/base box equivalent on the heavy side, with varied coating equivalents in the lighter side (detailed below), with a continuous cast steel chemistry of type MR, with a surface finish of type 7B or 7C, with a surface passivation of 0.7 mg/square foot of chromium applied as a

cathodic dichromate treatment, with coil form having restricted oil film weights of 0.3–0.4 grams/base box of type DOS-A oil, coil inside diameter ranging from 15.5 to 17 inches, coil outside diameter of a maximum 64 inches, with a maximum coil weight of 25,000 pounds, and with temper/coating/dimension combinations of: (1) CAT 4 temper, 1.00/0.50 pound/base box coating, 70 pound/base box (0.0077 inch) thickness, and 33.1875 inch ordered width; or (2) CAT5 temper, 1.00/0.50 pound/base box coating, 75 pound/base box (0.0082 inch) thickness, and 34.9375 inch or 34.1875 inch ordered width; or (3) CAT5 temper, 1.00/0.50 pound/base box coating, 107 pound/base box (0.0118 inch) thickness, and 30.5625 inch or 35.5625 inch ordered width; or (4) CADR8 temper, 1.00/0.50 pound/base box coating, 85 pound/base box (0.0093 inch) thickness, and 35.5625 inch ordered width; or (5) CADR8 temper, 1.00/0.25 pound/base box coating, 60 pound/base box (0.0066 inch) thickness, and 35.9375 inch ordered width; or (6) CADR8 temper, 1.00/0.25 pound/base box coating, 70 pound/base box (0.0077 inch) thickness, and 32.9375 inch, 33.125 inch, or 35.1875 inch ordered width.

■ Electrolytically tin coated steel having differential coating with 1.00 pound/base box equivalent on the heavy side, with varied coating equivalents on the lighter side (detailed below), with a continuous cast steel chemistry of type MR, with a surface finish of type 7B or 7C, with a surface passivation of 0.5 mg/square foot of chromium applied as a cathodic dichromate treatment, with ultra flat scroll cut sheet form, with CAT 5 temper with 1.00/0.10 pound/base box coating, with alithograph logo printed in a uniform pattern on the 0.10 pound coating side with a clear protective coat, with both sides waxed to a level of 15–20 mg/216 sq. in., with ordered dimension combinations of (1) 75 pound/base box (0.0082 inch) thickness and 34.9375 inch x 31.748 inch scroll cut dimensions; or (2) 75 pound/base box (0.0082 inch) thickness and 34.1875 inch x 29.076 inch scroll cut dimensions; or (3) 107 pound/base box (0.0118 inch) thickness and 30.5625 inch x 34.125 inch scroll cut dimension.

■ Tin-free steel coated with a metallic chromium layer between 100–200 mg/m² and a chromium oxide layer between 5–30 mg/m²; chemical composition of 0.05% maximum carbon, 0.03% maximum silicon, 0.60% maximum manganese, 0.02% maximum phosphorous, and 0.02% maximum sulfur; magnetic flux density (“Br”) of 10 kg minimum and a coercive force (“Hc”) of 3.8 Oe minimum.

■ Tin-free steel laminated on one or both sides of the surface with a polyester film, consisting of two layers (an amorphous layer and an outer crystal layer), that contains no more than the indicated amounts of the following environmental hormones: 1 mg/kg BADGE (BisPhenol—A Di-glycidyl Ether), 1 mg/kg BFDGE (BisPhenol—F Di-glycidyl Ether), and 3 mg/kg BPA (BisPhenol—A).

The merchandise subject to the order is currently classified in the Harmonized Tariff Schedule of the United States (HTSUS), under HTSUS subheadings 7210.11.0000, 7210.12.0000, 7210.50.0000, 7212.10.0000, and 7212.50.0000 if of non-alloy steel and under HTSUS subheadings 7225.99.0090, and 7226.99.0180 if of alloy steel. Although the subheadings are provided for convenience and customs purposes, our written description of the scope of the order is dispositive.

Continuation of the Order

As a result of the determinations by the Department and the USITC that revocation of the antidumping duty order on certain tin mill products from Japan would be likely to lead to continuation or recurrence of dumping and material injury to an industry in the United States, pursuant to section 751(d)(2) of the Act, the Department hereby orders the continuation of the antidumping duty order on certain tin mill products from Japan.

U.S. Customs and Border Protection will continue to collect cash deposits of estimated antidumping duties at the rates in effect at the time of entry for all imports of subject merchandise. The effective date of the continuation of this order will be the effective date listed above. Pursuant to section 751(c)(2) of the Act, the Department intends to initiate the next sunset review of this order not later than 30 days prior to the fifth anniversary of the effective date of continuation.

This five-year (sunset) review and this notice are in accordance with sections 751(c) and 777(i)(1) of the Act and 19 CFR 351.218(f)(4).

Dated: June 6, 2012.

Paul Piquado,

Assistant Secretary for Import Administration.

COMMODITY FUTURES TRADING COMMISSION

Sunshine Act Meeting

The following notice of a scheduled meeting is published pursuant to the provisions of the Government in the Sunshine Act, Public Law 94-409, 5 U.S.C. 552b.

AGENCY HOLDING THE MEETING:

Commodity Futures Trading Commission.

TIMES AND DATES: The Commission has scheduled a meeting for the following date: June 20, 2012 at 10:00 a.m.

PLACE: Three Lafayette Center, 1155 21st St. NW., Washington, DC, Lobby Level Hearing Room (Room 1300).

STATUS: Open.

MATTERS TO BE CONSIDERED: The Commission's Technology Advisory Committee is meeting at the above time and place, and it is expected that a quorum of the Commission will be present at the meeting.

CONTACT PERSON FOR MORE INFORMATION:

David A. Stawick, Secretary of the Commission, 202-418-5071.

David A. Stawick,

Secretary of the Commission.

BILLING CODE 6351-01-P

DEPARTMENT OF DEFENSE

Office of the Secretary

Defense Audit Advisory Committee (DAAC); Notice of Meeting

AGENCY: Under Secretary of Defense (Comptroller), DoD.

SUMMARY: Under the provisions of the Federal Advisory Committee Act of 1972 (5 U.S.C., Appendix, as amended), the Government in the Sunshine Act of 1976 (5 U.S.C. 552b, as amended), and 41 CFR 102-3.150, the Department of Defense announces the following Federal advisory committee meeting of the Defense Audit Advisory Committee (DAAC) will be held.

DATES: Thursday, July 12, 2012, beginning at 1:00 p.m. and ending at 3:00 p.m.

ADDRESSES: Pentagon, Room 3E754, Washington DC (escort required; see "Accessibility to the meeting" paragraph in **SUPPLEMENTARY INFORMATION**).

FOR FURTHER INFORMATION CONTACT: The Committee's Designated Federal Officer (DFO) is Sandra Gregory, Office of the Under Secretary of Defense (Comptroller) (OUSD(C)), 1100 Defense

Pentagon, Room 3D150, Washington, DC 20301-1100, sandra.gregory@osd.mil, (703) 614-3310. For meeting information please contact Yvette Brown, OUSD(C), 1100 Defense Pentagon, Room 3D150, Washington, DC 20301-1100, Yvette.brown@osd.mil, (703) 614-4819.

SUPPLEMENTARY INFORMATION:

(a) Purpose

The mission of the DAAC is to provide the Secretary of Defense, through the Under Secretary of Defense (Comptroller)/Chief Financial Officer, independent advice and recommendations on DoD financial management to include financial reporting processes, systems of internal controls, audit processes, and processes for monitoring compliance with relevant laws and regulations.

(b) Agenda

Below is the agenda for the July 12, 2012 meeting:

- 1:00 p.m. Welcome and Opening Remarks
- 1:20 p.m. Review of last Meeting Minutes
- 1:30 p.m. Financial Improvement Audit Readiness (FIAR) Status and Progress
- 2:15 p.m. Statement of Budgetary Resources (SBR) Way Forward
- 2:45 p.m. Closing Remarks

(c) Accessibility to the Meeting

Pursuant to 5 U.S.C. 552b and 41 CFR 102-3.140 through 102-3.165, and the availability of space, this meeting is open to the public. Seating is on a first-come basis. Members of the public who wish to attend the meeting must contact Ms. Brown at the number listed in **FOR FURTHER INFORMATION CONTACT** no later than 12:00 p.m. on Tuesday, July 10, 2012 to arrange a Pentagon escort. Public attendees are required to arrive at the Pentagon Metro Entrance on July 12, 2012, by 12:00 p.m. and complete security screening by 12:15 p.m. Security screening requires two forms of identification: (1) a government-issued photo I.D., and (2) any type of secondary I.D. which verifies the individual's name (i.e. debit card, credit card, work badge, social security card). Special Accommodations: Individuals requiring special accommodation to access the public meeting should contact Ms. Brown at least five business days prior to the meeting to ensure appropriate arrangements can be made.

(d) Procedures for Providing Written Comments

Pursuant to 41 CFR 102-3.105(j) and 102-3.140, and section 10(a)(3) of the
