Two types of information collection are planned:

- usability testing to understand game-play/usability. This information will be collected by focus group and will be digitally recorded 90 minute groups.
- A pre/post randomized trial to measure change in knowledge. This

information will be collected electronically through on-line questionnaire.

The game will be incorporated with a larger initiative to provide information about clinical research (<http://www.nhlbi.nih.gov/childrenandclinicalstudies/index.php>). *Frequency of Response:* Once. *Affected Public:* Individuals. *Type of Respondents:* Adolescents—aged 8–14.

The annual reporting burden is as follows: *Estimated Number of Respondents:* 6,148; *Estimated Number of Responses per Respondent:* 1; *Average Burden Hours Per Response:* 1.321; and *Estimated Total Annual Burden Hours Requested:* 370. The annualized cost to respondents is estimated at: \$3,700. There are no Capital Costs to report. The Operating Costs to collect this information is estimated at \$38,642.

Note: The following table should be the same table from section A.12 of the supporting statement.

Type of respondents	Estimated number of respondents	Estimated number of responses per respondent	Average burden hours per response	Estimated total annual burden hours requested
Adolescents—Wave one	30	1	1.5	45
Adolescents—Wave two	250	1	1.3	325
Total				370
