Grand Coulee Project Hydroelectric Authority; Notice of Preliminary Permit Application Accepted for Filing and Soliciting Comments, Motions To Intervene, and Competing Applications

On April 4, 2012, Grand Coulee Project Hydroelectric Authority filed an application for a preliminary permit, pursuant to section 4(f) of the Federal Power Act (FPA), proposing to study the feasibility of the Pinto Dam Hydroelectric Project (Pinto Dam Project or project) to be located at the U.S.

Bureau of Reclamation's Pinto dam, on Billy Clapp Lake near the city of Moses Lake in Grant County, Washington. The sole purpose of a preliminary permit, if issued, is to grant the permit holder priority to file a license application during the permit term. A preliminary permit does not authorize the permit holder to perform any land-disturbing activities or otherwise enter upon lands or waters owned by others without the owners' express permission.

The proposed project would use the existing Pinto dam, and would consist of the following new facilities: (1) A 72-inch-diameter penstock connecting the existing Pinto dam outlet tunnel to a powerhouse located immediately downstream of the dam; (2) a powerhouse containing a 3.4-megawatt Francis turbine/generator unit; (3) a tailrace discharging flows into the existing feed route between Billy Clapp Lake and Brook Lake; (4) a 7,000-foot-long, 34.5-kilovolt (kV) transmission line extending from the project to a 34.5-kV transmission line owned by the Public Utility District No. 1 of Grant County, Washington; and (5) appurtenant facilities. The estimated annual generation of the Pinto Dam Project would be 8.1 gigawatt-hours.
