POLICY JUSTIFICATION

Poland—Ground Controller Approach Radar Systems

The Government of Poland has requested a possible sale of 9 Ground Controlled Approach Systems, ICAO Category II, with PSR, PAR, SSR, Very High Frequency/Ultra High Frequency radio equipment, site surveys, systems installation and testing, spare and repair parts, tools and test equipment, personnel training and training equipment, technical data and publications, warranties, U.S. Government and contractor engineering, technical, and logistics support services, and other related elements of logistics support. The estimated cost is \$200 million.

This proposed sale will contribute to the foreign policy and national security

of the United States by helping to improve the security and capability of a staunch NATO ally. Poland continues to be an important force for political stability and economic progress in Central Europe.

The proposed sale will further standardize the air navigation and approach radar capabilities of Poland, increasing aviation safety across the country and region. This is a continuation of a modernization program started several years ago. Delivery of this system will support Poland's F-16 and C-130 programs and the USAF Aviation Detachment.

The proposed sale of this equipment and support will not alter the basic military balance in the region.

The prime contractor will be ITT Exelis Inc. in Van Nuys, California. There are no known offset agreements proposed in connection with this potential sale at this time.

Implementation of this proposed sale will not require the assignment of any additional U.S. Government or contractor representatives to Poland.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

*Policy Justification**Qatar—AGM-114K3A or AGM-114R3 HELLFIRE Missiles*

The Government of Qatar has requested a possible sale of 700 AGM-114K3A or AGM-114R3 HELLFIRE tactical missiles, 25 training missiles, containers, spare and repair parts, support and test equipment, publications and technical data, personnel and training equipment, U.S. Government and contractor logistics, engineering and technical support, and other related elements of program support. The estimated cost is \$137 million.

This proposed sale will contribute to the foreign policy and national security of the United States by helping to improve the security of a friendly country that has been, and continues to be an important force for political stability and economic progress in the Middle East.

Qatar intends to use these missiles to counter current and future threats. This proposed sale will contribute to Qatar's military goal of updating its Anti-Surface Warfare capability while further enhancing its interoperability with the U.S. and other allies. This capability will serve to deter potential attacks against strategic targets across Qatar, to include infrastructure and resources vital to the security of the U.S.

The proposed sale of this weapon system will not alter the basic military balance in the region.

The prime contractor is Lockheed Martin Corporation in Orlando, Florida and Troy, Alabama. There are no known offset agreements proposed in connection with this sale.

Implementation of this proposed sale will not require the assignment of U.S. Government or contractor representatives to Qatar.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

Transmittal No. 12-24

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b)(1) of the Arms Export Control Act

Annex

Item No. vii

(vii) Sensitivity of Technology:

1. The AGM-114K3A or AGM-114R3 HELLFIRE II is a precision guided, subsonic missile with a maximum range of up to 8,000 meters. The missile does not contain sensitive technology and is Unclassified. However, it does contain hazardous material which requires hazardous material packaging, handling, and shipping. Releasable technical manuals are Unclassified.

2. If a technologically advanced adversary were to obtain knowledge of the specific hardware and software elements, the information could be used to develop countermeasures which might reduce weapon system effectiveness or be used in the

development of a system with similar or advanced capabilities.
