DEPARTMENT OF DEFENSE

Department of the Army, Corps of Engineers

Intent To Prepare a Draft Environmental Impact Statement/ Environmental Impact Report for the Proposed Ballona Wetlands Restoration Project at Ballona Creek Within the City and County of Los Angeles, CA

AGENCY: U.S. Army Corps of Engineers, Department of the Army, DoD.

ACTION: Notice of intent.

SUMMARY: The U.S. Army Corps of Engineers (Corps) and the California Department of Fish and Game (CDFG) intend to jointly prepare a Draft Environmental Impact Statement/ Environmental Impact Report (DEIS/ EIR) for the proposed Ballona Wetlands Restoration Project. The proposed project is intended to return the daily ebb and flow of tidal waters, maintain freshwater circulation, and augment the physical and biological functions and services in the project area. Restoring the wetland functions and services would allow native wetland vegetation to be reestablished, providing important habitat for a variety of wildlife species. As a restored site, the Ballona Wetlands would play an important role to provide seasonal habitat for migratory birds. A restored, optimally functioning wetland would also benefit the adjacent marine environment and enhance the quality of tidal waters.

DATES: Submit comments on or before September 10, 2012.

FOR FURTHER INFORMATION CONTACT: Dr. Daniel P. Swenson at (213) 452-3414

(daniel.p.swenson@usace.army.mil), U.S. Army Corps of Engineers, Los Angeles District, P.O. Box 532711, Los Angeles, CA 90053-2325.

SUPPLEMENTARY INFORMATION: The Corps intends to prepare a joint EIS/EIR to assess the environmental effects associated with the proposed project. CDFG is the state lead agency for the EIR pursuant to the California Environmental Quality Act (CEQA).

1. Background. The 600-acre Ballona Wetlands Ecological Reserve is located in the western portion of the City of Los Angeles (partially within unincorporated Los Angeles County), south of Marina Del Rey and north of Playa Del Rey. The project site is situated approximately 1.5 miles west of Interstate 405 and approximately 1/4-mile east of Santa Monica Bay. The project site is owned by the State of California, and is bisected by and includes a channelized span of Ballona Creek, a component feature of a federal flood risk management project.

2. Project Purpose and Need. A substantial portion of California's historic coastal wetlands have been lost. Restoration of coastal wetlands is needed in order to increase available nursery and foraging habitat for wildlife and to provide recreational and educational opportunities to the public. The Ballona Wetlands ecosystem is one of the last remaining major coastal wetlands in Los Angeles County. It is estimated that historically the wetlands ecosystem spanned more than 2,000
