## ENVIRONMENTAL PROTECTION AGENCY

### Notice of Availability of Microbial Risk Assessment Guideline: Pathogenic Microorganisms With Focus on Food and Water

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Notice of availability.

**SUMMARY:** The U.S. Environmental Protection Agency (EPA) and the Food Safety and Inspection Service (FSIS) of the U.S. Department of Agriculture are announcing the availability of the *Microbial Risk Assessment Guideline: Pathogenic Microorganisms with Focus on Food and Water* (MRA Guideline). The MRA Guideline will improve transparency in the way that the two federal agencies conduct microbial risk assessment and also promote consistency in approaches and methods. The MRA Guideline can be applied to similar scenarios involving microbial contamination, and it will serve a resource for federal government risk assessors, their agents, contractors, and for other members of the risk assessment community. When appropriate, the EPA intends to use the guidance prospectively when conducting risk assessments.

**DATES:** The document, *Microbial Risk Assessment Guideline: Pathogenic Microorganisms with Focus on Food and Water* will be available on July 31, 2012.

**ADDRESSES:** A downloadable version and supporting materials are available on-line at <http://www.epa.gov/raf/microbial.htm>.

**FOR FURTHER INFORMATION CONTACT:** Dr. Michael W. Broder, Risk Assessment Forum, Office of the Science Advisor (8105R), U.S. Environmental Protection Agency, 1200 Pennsylvania Ave. NW., Washington, DC 20460. His telephone number is (202) 564-3393. His email address is [broder.michael@epa.gov](mailto:broder.michael@epa.gov).

*Internet:* The document can be downloaded on-line at <http://www.epa.gov/raf/microbial.htm>.

**SUPPLEMENTARY INFORMATION:** Risk assessment is used by federal agencies and other entities as a systematic way to prepare, organize, and analyze information to help make informed regulatory decisions, establish programs, and prioritize research.

In 1983, *Risk Assessment in the Federal Government; Managing the Process* was published by the National Research Council (NRC) of the National Academy of Science to formalize the risk assessment process for chemicals in the environment and provide a basic framework that federal agencies could apply when conducting risk assessments. As the use of risk assessment as a tool to assist the federal government in its decision-making process has grown, it became apparent that the 1983 NRC framework document, which was designed to address chemical contaminants, was not as useful for microbial risk assessment. Agencies conducting quantitative microbial risk assessment had to individually modify the 1983 framework to meet their specific needs. As a result, there existed no consistent approach to conducting microbial risk assessment among federal agencies.

The EPA initiated the process of developing a microbial risk assessment guideline and engaged FSIS to co-lead the project. They were joined by scientists from other federal agencies in establishing a collaborative effort to develop this guideline. Clear and credible microbial risk assessment methods will leverage limited resources, promote efficiencies, improve transparency with stakeholders, and encourage joint interaction among agencies.

The MRA Guideline facilitates the systematic and transparent consideration of all relevant factors that impact the risk assessment, and also

facilitates reproducible risk evaluation. Using this guideline, agencies assessing a similar microbial medium or pathogen are able to more readily compare and contrast the details and assumptions of their assessment to another agency's assessment. Although the focus of this guideline is microbial contamination of water and food, it will also be useful for microbial risk assessment in a wide range of media and scenarios. The MRA Guideline applies to viruses, bacteria, protozoa, and fungi that are or maybe pathogenic to humans.

EPA released a draft of the document for public comment in July, 2011 (76 FR 44586). EPA received two public comments—one from a member of the public and another from a foreign government authority responsible for the assessment of similar health risks in their country. All comments received by the comment period closing date were shared with an external peer review panel for their consideration and considered when revising the document. The MRA Guideline is available at: <http://www.epa.gov/raf/microbial.htm>; the peer review panel's comments and EPA's response to comments can also be found at the same link.

Dated: July 13, 2012.

A system of records for the do-not-call registry was created by the Federal Trade Commission (FTC) under the Privacy Act. The FTC originally published a notice in the **Federal Register** describing the system. See 68 FR 37494, June 24, 2003. The FTC updated its system of records for the do-not-call registry in 2009. See 74 FR 17863, April 17, 2009.

*Privacy Impact Assessment:* Yes. The Privacy Impact Assessment (PIA) was completed on June 28, 2007. It may be reviewed at: <http://www.fcc.gov/omb/privacyact/Privacy-Impact-Assessment.html>. The Commission is in the process of updating the PIA to incorporate various revisions made to the SORN.

*Needs and Uses:* The reporting requirements included under this OMB Control Number 3060-0519 enable the Commission to gather information regarding violations of Section 227 of the Communications Act, the Do-Not-Call Implementation Act (Do-Not-Call Act), and the Commission's implementing rules. If the information collection was not conducted, the Commission would be unable to track and enforce violations of Section 227 of the Communications Act, the Do-Not-Call Act, or the Commission's implementing rules. The Commission's implementing rules provide consumers with several options for avoiding most unwanted telephone solicitations.

The national do-not-call registry supplements the company-specific do-not-call rules for those consumers who wish to continue requesting that particular companies not call them. Any company that is asked by a consumer, including an existing customer, not to call again must honor that request for five (5) years.

A provision of the Commission's rules, however, allows consumers to give specific companies permission to call them through an express written agreement. Nonprofit organizations, companies with whom consumers have an established business relationship, and calls to persons with whom the telemarketer has a personal relationship are exempt from the "do-not-call" registry requirements.

On September 21, 2004, the Commission released the Safe Harbor Order establishing a limited safe harbor in which persons will not be liable for placing autodialed and prerecorded message calls to numbers ported from a wireline service within the previous 15 days. The Commission also amended its existing National Do-Not-Call Registry safe harbor to require telemarketers to scrub their lists against the Registry every 31 days.

On December 4, 2007, the Commission released the DNC NPRM seeking comment on its tentative conclusion that registrations with the Registry should be honored indefinitely, unless a number is disconnected or reassigned or the consumer cancels his registration.

On June 17, 2008, in accordance with the Do-Not-Call Improvement Act of 2007, the Commission revised its rules to minimize the inconvenience to consumers of having to re-register their preferences not to receive telemarketing calls and to further the underlying goal of the National Do-Not-Call Registry to protect consumer privacy rights. The Commission released a Report and Order in CG Docket No. 02-278, FCC

08–147, amending the Commission's rules under the Telephone Consumer Protection Act (TCPA) to require sellers and/or telemarketers to honor registrations with the National Do-Not-Call Registry so that registrations will not automatically expire based on the current five year registration period. Specifically, the Commission modified § 64.1200(c)(2) of its rules to require sellers and/or telemarketers to honor numbers registered on the Registry indefinitely or until the number is removed by the database administrator or the registration is cancelled by the consumer.

Most recently, on February 15, 2012, the Commission released a Report and Order in CG Docket No. 02–278, FCC 12–21, revising its rules to: (1) Require prior express written consent for all autodialed or prerecorded telemarketing calls to wireless numbers and for all prerecorded telemarketing calls to residential lines; (2) eliminate the established business relationship exception to the consent requirement for prerecorded telemarketing calls to residential lines; (3) require telemarketers to include an automated, interactive opt-out mechanism in all prerecorded telemarketing calls, to allow consumers more easily to opt out of future robocalls during a robocall itself; and (4) require telemarketers to comply with the 3% limit on abandoned calls during each calling campaign, in order to discourage intrusive calling campaigns.

Finally, the Commission also exempted from the Telephone Consumer Protection Act requirements prerecorded calls to residential lines made by health care-related entities governed by the Health Insurance Portability and Accountability Act of 1996.
