

2012 until 6 p.m. on Wednesday, August 29, 2012 and for 30 consecutive days from 12:01 a.m. on Friday, September 7, 2012 until 11:59 p.m. on Saturday, October 6, 2012.

The closure is necessary to replace the wire rope lifting cables, and for the rehabilitation of most electrical motors and components, most mechanical components and the operator house. This maintenance is essential for the continued operation of the bridge. Notices will be published in the Eighth Coast Guard District Local Notice to Mariners and will be broadcast via the Coast Guard Broadcast Notice to Mariners System.

Navigation on the waterway consists of commercial and recreational vessels and sailboats and small tugs with and without tows. An alternate route is available via the Rigolets or Chef Menteur Pass. Vessels with vertical clearance requirements of less than 50 feet above Mean High Water may pass under the bridge while in the closed-to-navigation position.

Due to prior experience and coordination with waterway users, it has been determined that this closure will not have a significant effect on vessels that use the waterway.

In accordance with 33 CFR 117.35(e), the drawbridge must return to its regular operating schedule immediately at the end of the designated time period. This deviation from the operating regulations is authorized under 33 CFR 117.35.

Dated: July 24, 2012.

David M. Frank,
Bridge Administrator.

SUMMARY: The Commander, First Coast Guard District, has issued a temporary deviation from the regulation governing the operation of the Route 1 Bridge across the Mystic River, mile 2.8, at Mystic, Connecticut. The deviation is necessary to facilitate bridge rehabilitation repairs at the bridge.

Under this deviation the bridge may remain in the closed position November through April.

SUPPLEMENTARY INFORMATION: The Route 1 Bridge across the Mystic River at mile 2.8, has a vertical clearance of 4 feet at mean high water and 7 feet at mean low water. The drawbridge operation regulations are listed at 33 CFR 117.211.

The normal waterway users are predominantly recreational craft of various sizes.

The Coast Guard issued two previous temporary deviations, (75 FR 78163) effective from December 2, 2010 through April 15, 2011 and (76 FR 70348) effective from December 1, 2011 through April 15, 2012, to facilitate this major bridge rehabilitation project that allowed the Route 1 Bridge to remain closed during the winter months when the bridge rarely opens. Both previous temporary deviations achieved successful results without any problems or complaints from the mariners that normally transit the Mystic River.

The owner of the bridge, Connecticut Department of Transportation, has requested a third temporary deviation from the regulations to allow the bridge to remain in the closed position to complete rehabilitation repairs at the bridge.

Under this temporary deviation the Route 1 Bridge may remain in the closed position from November 1, 2012 through April 15, 2013, to facilitate completion of bridge rehabilitation repairs. Vessels that can pass under the bridge in the closed position may do so at any time.

The bridge has received few requests to open during this time period during the past three years. The waterway users were advised of the requested bridge closure and no objections were received.

In accordance with 33 CFR 117.35(e), the bridge must return to its regular operating schedule immediately at the end of the designated time period. This deviation from the operating regulations is authorized under 33 CFR 117.35.

Dated: July 25, 2012.
