Proposed Project

Development of an Evaluation Plan to Evaluate Grantee Attainment of Selected Activities of Comprehensive Cancer Control Priorities—New—National Center for Chronic Disease Prevention and Health Promotion (NCCDPHP), Centers for Disease Control and Prevention (CDC).

Background and Brief Description

Comprehensive Cancer Control (CCC) is a collaborative process through which a community and its partners pool resources to reduce the burden of cancer. The concept is built on the premise that effective cancer prevention and control planning should address the cancer continuum (defined as prevention, diagnosis, treatment, survivorship, and palliative care), and include: The integration of many disciplines, major cancers, all populations, all geographic areas, a diverse group of stakeholders who must coordinate their efforts to assess and address the cancer burden in a jurisdiction. The National Comprehensive Cancer Control Program (NCCCP) is administered by the Centers for Disease Control and Prevention, National Center for Chronic Disease Prevention and Health Promotion, Division of Cancer Prevention and Control (DCPC). Through NCCCP, CDC supports sixty-nine comprehensive cancer control programs in 50 states, the District of Columbia, seven tribes and tribal organizations, and seven U.S. Associated Pacific Islands/territories with a goal of establishing coalitions, assessing the burden of cancer, determining intervention priorities, and developing and implementing CCC plans. The NCCCP is authorized under sections 317(k)(2) and (e) of the Public Health Service Act (42 U.S.C. section 247b[e] and [k](2)).

In 2009 and 2010, CDC developed six priorities to guide the work of grantees of the CDC-funded National Comprehensive Cancer Control Program: (1) Emphasize primary prevention of cancer; (2) support early detection and treatment activities; (3)
