

*F. NTIA Consultations With FirstNet on the State and Local Implementation Grant Program Requirements*

As previously discussed, the Act directs NTIA to consult with FirstNet to establish the requirements of the State and Local Implementation Grant Program not later than 6 months after the date of the Act's enactment, or by August 22, 2012. The Act also required that FirstNet be established no later than August 20, 2012. The Act's framework, which essentially placed the creation of FirstNet and the development of the grant program requirements on parallel tracks, proved challenging for NTIA as it attempted to fulfill the statutory mandate to consult with FirstNet in establishing the State and Local Implementation Grant Program. As noted, NTIA has only started to consult with the newly-formed FirstNet Board on the grant program requirements outlined in this Notice. NTIA expects these consultations to proceed over the next few months as NTIA continues to prepare the FFO in which the State and Local Implementation Grant Program requirements will be described more fully.

Dated: August 16, 2012.

**SUPPLEMENTARY INFORMATION:** Exports of electricity from the United States to a foreign country are regulated by the Department of Energy (DOE) pursuant to sections 301(b) and 402(f) of the Department of Energy Organization Act (42 U.S.C. 7151(b), 7172(f)) and require authorization under section 202(e) of the FPA (16 U.S.C. 824a(e)).

On February 22, 2007 the Department of Energy (DOE) issued Order No. EA-294-A, which authorized TexMex to transmit electric energy from the United States to Mexico as a power marketer for a five-year term using existing international transmission facilities. That authority expired on February 22, 2012. On July 23, 2012, TexMex filed an application with DOE for renewal of the export authority contained in Order No. EA-294-A for an additional five-year term.

It is reasonable to presume that all of the electric energy that TexMex proposes to export to Mexico will be surplus energy purchased from electric utilities, Federal power marketing agencies, and other entities within the United States. The existing international transmission facilities to be utilized by TexMex have previously been authorized by Presidential permits issued pursuant to Executive Order 10485, as amended, and are appropriate for open access transmission by third parties.

**Procedural Matters:** Any person desiring to be heard in this proceeding should file a comment or protest to the application at the address provided above. An additional copy is to be provided directly to Guillermo Gonzalez G., c/o Protama S.A. de C.V., Tonalá 44, Col. Roma, Mexico D.F., Mexico 06700 and Douglas F. John and Matthew T. Rick, John & Hengerer, 1730 Rhode Island Ave. NW., Suite 600, Washington, DC 20036. A

final decision will be made on this application after the environmental impacts have been evaluated pursuant to DOE's National Environmental Policy Act Implementing Procedures (10 CFR Part 1021) and after a determination is made by DOE that the proposed action will not have an adverse impact on the reliability of the U.S. electric power supply system.

Copies of this application will be made available, upon request, for public inspection and copying at the address provided above, by accessing the program Web site at <http://energy.gov/node/11845> or by emailing Angela Troy at [Angela.Troy@hq.doe.gov](mailto:Angela.Troy@hq.doe.gov).

On September 26, 2007, the Department of Energy (DOE) issued Order No. EA-328 authorizing RBC Energy to transmit electric energy from the United States to Canada as a power marketer for a five-year term. The current export authority in Order No. EA-328 will expire on September 26, 2012. On July 26, 2012, RBC Energy filed an application with DOE for renewal of that authority for an additional five-year term.

In its application, RBC Energy states that neither it nor its affiliates "owns, operates or controls any electric power transmission or distribution facilities in the United States." RBC Energy states and it is reasonable to presume, that the electric power proposed to be exported to Canada will be purchased from electric utilities and federal power marketing agencies pursuant to voluntary agreements and will be surplus to the system needs of the entities selling the power to RBC Energy. The application also indicates that RBC Energy is a power marketer authorized by the Federal Energy Regulatory Commission (FERC) to sell energy, capacity, and specified ancillary services at market-based rates.

The existing international transmission facilities to be utilized by RBC Energy have previously been authorized by Presidential permits issued pursuant to Executive Order 10485, as amended, and are appropriate for open access transmission by third parties.
