

assess, and report on, compliance with U.S. obligations under the Montreal Protocol.

EPA has implemented an electronic reporting system that allows regulated entities to prepare and submit data electronically. Coupled with the widespread use of the standardized forms, electronic reporting has improved data quality and made the reporting process efficient for both reporting companies and EPA. Most reporting is done electronically.

Pursuant to regulations in 40 CFR part 2, subpart B, reporting businesses are entitled to assert a business confidentiality claim covering any part of the submitted business information as defined in 40 CFR 2.201(c). EPA's practice is to manage the reported information as confidential business information.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 1,601 hours and \$161,793. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

The ICR provides a detailed explanation of the agency's estimate, which is only briefly summarized here:

Estimated total number of potential respondents: 49.

Frequency of response: Annually, quarterly, or as needed (depending on the report).

Estimated total average number of responses for each respondent: 7.

Estimated total annual burden hours: 1,601.

Estimated total annual costs: \$161,793. This includes an estimated burden cost of \$160,428 and an estimated cost of \$1,365 for capital investment or maintenance and operational costs.

Are there changes in the estimates from the last approval?

There is a decrease of 259 hours in the total estimated respondent burden compared with that identified in the ICR currently approved by OMB. This decrease reflects the expansion of the electronic reporting program.

What is the next step in the process for this ICR?

EPA will consider the comments received and amend the ICR as appropriate. The final ICR package will then be submitted to OMB for review and approval pursuant to 5 CFR 1320.12. At that time, EPA will issue another **Federal Register** notice pursuant to 5 CFR 1320.5(a)(1)(iv) to announce the submission of the ICR to OMB and the opportunity to submit additional comments to OMB. If you have any questions about this ICR or the approval process, please contact Robert Burchard at burchard.robert@epa.gov.

Dated: September 4, 2012.

Drusilla Hufford,

Director, Stratospheric Protection Division.
