The Bureau of Justice Statistics uses this information in published reports and statistics. The reports will be made available to the U.S. Congress, Executive Office of the President, practitioners, researchers, students, the media, others interested in criminal justice statistics, and the general public.

(5) An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond: An approximate 3,152 total respondents will be asked to submit an estimated 11,202 responses each year to this collection program. The typical amount of time needed for a respondent to complete each form is broken down as follows:

*Local jails/death reports (forms CJ-9 and CJ-10)*—600 respondents will have

an average response time of 30 minutes per form, for a total of 451 hours. Analysis of data from past years shows that approximately 80% of jails nationwide have zero deaths in a given calendar year. Thus, based on the 2010 data, approximately 20% of the 3,000 jails will complete death reports, resulting in 600 respondents.

Respondents reporting zero deaths will not need to complete a death report form. Based on 2009 and 2010 data, approximately 22% of the total 4,100 death reports received was from jail respondents; thus, we expect to receive approximately 902 death reports from jails. For jurisdictions reporting a death, the average response time is estimated at 30 minutes per death, for a total of 451 hours devoted to reporting data on deaths in jails. The estimated time is based on feedback from jail staff.

*Local jails/annual (forms CJ-9A and CJ-10A)*—an estimated 3,000 jail respondents will have an average response time of 15 minutes per form, for a total of 750 hours. The estimated time is based on feedback from jail staff.

*State prison/death reports (form NPS-A)*—50 state prison respondents are estimated to have an average response time of 30 minutes per death, across 3,198 deaths each year, for a total of 1,599 hours. Based on 2009 and 2010 data, 78% of the total 4,100 death reports received was from state prisons; thus, we expect to receive approximately 3,198 death reports from state prisons. The estimated time is based on feedback from state prison staff.

*State prison/annual (form NPS-4)*—50 state prison respondents are estimated to have an average response time of 5 minutes per form, for a total of 4 hours. Based on 2010 data, we expect approximately 50 respondents. The estimated time is based on feedback from state prison staff.

*Local jail and state prisons (verification call)*—3,050 respondents (3,000 jail jurisdiction respondents and 50 state department of corrections respondents) will be asked to participate in the verification call, which has an average response time of 8 minutes per

call, for a total of 407 hours (400 for jail respondents and 7 for state prison respondents). The estimated time is based on the average time to complete a verification call with a respondent.

*Arrest-Related/death reports (CJ-11A)*—50 state-level respondents and 2 local law enforcement agencies are estimated to have an average response time of 60 minutes per death, across 900 deaths each year, for a total of 900 hours.

*Arrest-Related/summary (CJ-11)*—50 state-level respondents and 2 local law enforcement agencies are estimated to have an average response time of 5 minutes per form, for a total of 4 hours. Based on 2010 data, we expect approximately 50 respondents. The estimated time is based on feedback from state-level respondents.

(6) An estimate of the total public burden (in hours) associated with the collection: 4,115 annual burden hours. The estimates contributing to this calculation are provided in the table below.
