DEPARTMENT OF COMMERCE

Submission for OMB Review; Comment Request

The Department of Commerce will submit to the Office of Management and Budget (OMB) for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

Agency: National Oceanic and Atmospheric Administration (NOAA).

Title: Bottlenose Dolphin

Conservation Outreach Survey.

OMB Control Number: 0648-0594.

Form Number(s): NA.

Type of Request: Regular submission (revision of a current information collection).

Number of Respondents: 156.

Average Hours Per Response: 30 minutes.

Burden Hours: 79.

Needs and Uses: This request is for a revision of a current information collection.

The objective of these surveys is to assess the level of awareness on issues related to regulations preventing feeding/harassment of wild bottlenose dolphins, which are protected under the Marine Mammal Protection Act. In particular, the surveys are designed to determine what commercial businesses and the general public know about specific regulations prohibiting feeding and harassment of bottlenose dolphins, and how they gained their knowledge and/or perceptions on the topic. The first survey was conducted in Panama City, Florida, where numerous incidences of dolphin harassment and feeding are continually documented. Revision: The intent is to use this survey in one to two other geographic areas of the southeast region that are also "hot-spots" for dolphin harassment and feeding activities to gain a similar understanding and ensure outreach messages are appropriate for intended audiences.

National Marine Fisheries Service (NMFS) will request information from local residents, tourists, and commercial businesses through a one-time survey in the geographic location(s) identified in the revision supporting statement. This information, upon receipt, will be used to develop effective and better-targeted outreach efforts in order to enhance bottlenose dolphin conservation in the southeast United States.

Affected Public: Business or other for-profit organizations; individuals or households.

Frequency: One time.

Respondent's Obligation: Voluntary.

OMB Desk Officer:

OIRA_Submission@omb.eop.gov.

Copies of the above information collection proposal can be obtained by calling or writing Jennifer Jessup, Departmental Paperwork Clearance Officer, (202) 482-0336, Department of Commerce, Room 6616, 14th and Constitution Avenue NW., Washington, DC 20230 (or via the Internet at JJessup@doc.gov).

Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to

OIRA_Submission@omb.eop.gov.

Dated: September 13, 2012.

Gwellnar Banks,

Management Analyst, Office of the Chief Information Officer.

Magnuson-Stevens Act Provisions; General Provisions for Domestic Fisheries; Application for Exempted Fishing Permit

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; request for comments.

SUMMARY: The Assistant Regional Administrator for Sustainable Fisheries, Northeast Region, NMFS (Assistant Regional Administrator), has made a preliminary determination that an Exempted Fishing Permit (EFP) application submitted by the Nature Conservancy contains all of the required information and warrants further consideration. The EFP would exempt participating vessels from minimum fish size and possession limits of Atlantic halibut.

Regulations under the Magnuson-Stevens Fishery Conservation and Management Act require publication of this notification to provide interested parties the opportunity to comment on EFP applications.

DATES: Comments must be received on or before October 3, 2012.

ADDRESSES: You may submit written comments by any of the following methods:

- *Email:* nero.efp@noaa.gov. Include in the subject line "Comments on Nature Conservancy EFP."
- *Mail:* John K. Bullard, Regional Administrator, NMFS, NE Regional Office, 55 Great Republic Drive, Gloucester, MA 01930. Mark the outside of the envelope "Comments on Nature Conservancy EFP."
- *Fax:* (978) 281-9135.

FOR FURTHER INFORMATION CONTACT:

Brett Alger, Fisheries Management Specialist, 978-675-2153, Brett.Alger@noaa.gov.

SUPPLEMENTARY INFORMATION: The Nature Conservancy submitted a complete application for an EFP on August 6, 2012, to enable data collection activities that the regulations on commercial fishing would otherwise restrict. The EFP would exempt four federally permitted commercial fishing vessels from minimum halibut size and possession limits (41 inches and 1 halibut per trip) for the purpose of tagging and releasing Atlantic halibut during commercial fishing operations

while operating under a project managed by the Nature Conservancy and the Cape Cod Commercial Hook Fishermen's Association. The co-managed project is attempting to reduce halibut assessment uncertainties such as catchability in fishery-independent surveys, stock structure, and regional growth rates.

Fishing operations would occur within the Gulf of Maine and Georges Bank Regulated Mesh Areas. Vessels would use approximately 900 hooks per set, make an average trip of 6 to 12 sets per day, with an average soak time of 3 to 4 hr per set. Each vessel would record halibut size, time and location of capture, whether it was retained or released, gear used, depth fished, bait type, and condition upon release. Fish would be tagged with a wire "spaghetti" tag, each marked with a unique number and recorded; all participants would complete a training program in the tagging and release of halibut.

Participating vessels would expect to encounter a mix of groundfish species, skates, dogfish, and other non-commercial fish species as they target primarily haddock and cod. Any undersized Atlantic halibut caught would be tagged and released. In addition, all other undersized and non-commercial fish would be handled per normal fishing operations and returned to sea as quickly as possible. There would be no landing of non-compliant fish on board the vessels. All catch of stocks allocated to Sectors by vessels on a Sector trip would be deducted from the Sector's Annual Catch Entitlement for each Northeast multispecies stock, including halibut. Because the current commercial catch rates of halibut are relatively low, tagging would be done opportunistically, and there is no target number of halibut to tag for the project. The participating vessels would be required to comply with all other applicable requirements and restrictions specified at 50 CFR part 648, unless specifically exempted in this EFP.

If approved, the applicant may request minor modifications and extensions to the EFP throughout the year. EFP modifications and extensions may be granted without further notice if they are deemed essential to facilitate completion of the proposed research and have minimal impact that do not change the scope or impact of the initially approved EFP request. Any fishing activity conducted outside the scope of the exempted fishing activity would be prohibited.
