#### History and Description of the Remains

Between 1966 and 1968, human remains representing a minimum of 34 individuals were removed from the Anniversary Site, within Walnut Canyon National Monument in Coconino County, AZ, during a legally authorized National Park Service and Northern Arizona University excavation. No known individuals were identified. The 443 associated funerary objects are 351 beads, 10 bowls, 4 jars, 6 ladles, 7 un-worked animal bones, 4 bags of un-worked animal bones, 6 bone artifacts, 5 rubbing/polishing stones, 4 flake tools, 4 bags of ceramic sherds, 2 ceramic sherds, 3 projectile points, 3 pendants, 2 ground stone artifacts, 2 nodules, 2 scrapers, 2 bifaces, 2 un-worked stones, 2 boxes of soil, 6 boxes of wood fragments, 1 anvil, 1 ceramic artifact, 1 worked ceramic sherd, 2 manos, 1 metate, 1 arrow shaft straightener, 1 awl, 1 figurine, 1 bag of charcoal, 1 drill, 1 chopper, 1 painted wood staff, 1 unworked shell, 1 worked stone, and 1 box of pigment.

All of the human remains have been analyzed by physical anthropologists who have determined them to be Native American. All burials were excavated from the midden immediately adjacent to and contemporaneous with the site. Individuals were found lying in extended, supine positions, with the exception of one individual who was found loosely flexed at the knees. On the basis of architecture and ceramics, the site is dated to A.D. 1100-1200.

Evidence demonstrating continuity between the people of Walnut Canyon in the 1100s and the Hopi Tribe of Arizona and the Zuni Tribe of the Zuni Reservation, New Mexico, includes similarities in material culture, architecture, mortuary practices, settlement patterns, and agricultural methods. Both Hopi and Zuni oral histories indicate connections to the people of the Anniversary Site specifically and of Walnut Canyon generally. In addition, the Hopi trace four clans and the Zuni trace several medicine societies to prehistoric Walnut Canyon.
