

Western's action. Western's action does not affect floodplains or wetlands.

Alternatives Considered

FHWA examined several road alignment alternatives, ultimately selecting Alternative D as their preferred alternative. Western had to wait for FHWA to decide on its course of action before determining which transmission structures and lines would be affected and need to be modified. The no action alternative assumed that the Project would not be constructed and no transmission structures or lines would need to be modified. FHWA did not select the no action alternative since it did not meet their purpose and need.

Mitigation Measures

Western will adhere to its Construction Standard 13 "Environmental Quality Protection." Long-term operations of the transmission line will follow Western's standard operating procedures and will not be affected by this action. In addition to Construction Standard 13, the following measures apply to the modifications that will be made to Western's transmission system:

1. Protection of the desert tortoise through compliance with the FHWA Biological Opinion.
2. Protection of cultural and historical resources as signatories to the Programmatic Agreement.

Decision

Western's decision is to modify its transmission system as described above in support of FHWA's decision to construct Alternative D.¹ This ROD was prepared following the requirements of the Council on Environmental Quality Regulations for Implementing NEPA (40 CFR parts 1500–1508) and DOE's Procedures for Implementing NEPA (10 CFR part 1021).
