POSTAL SERVICE**39 CFR Part 111****New Mailing Standards for Domestic Mailing Services Products**

AGENCY: Postal Service™.

ACTION: Proposed rule.

SUMMARY: In October 2012, the Postal Service filed a notice of mailing services price adjustments with the Postal Regulatory Commission (PRC), effective in January 2013. This proposed rule contains the revisions to *Mailing Standards of the United States Postal Service*, Domestic Mail Manual (DMM®) that we would adopt to implement the changes coincident with the price adjustments.

DATES: We must receive comments on or before November 23, 2012.

ADDRESSES: Mail or deliver written comments to the manager, Product Classification, U.S. Postal Service,® 475 L'Enfant Plaza SW., Room 4446, Washington, DC, 20260-5015. You may inspect and photocopy all written comments at USPS® Headquarters Library, 475 L'Enfant Plaza SW., 11th Floor N, Washington DC by appointment only between the hours of 9 a.m. and 4 p.m., Monday through Friday by calling 1-202-268-2906 in advance. Faxed comments are not accepted.

FOR FURTHER INFORMATION CONTACT: Bill Chatfield, 202-268-7278.

SUPPLEMENTARY INFORMATION: Proposed prices will be available under Docket Number R2013-1 on the Postal Regulatory Commission's Web site at www.prc.gov.

The Postal Service's proposed rule includes several mail classification changes, modifications to mailpiece characteristics, and changes in classification terminology.

Proposed Change for Letters*Commercial First-Class Mail® Letters*

The pricing structure for presorted and automation First-Class Mail letters would retain the change implemented in 2012 for the minimum postage charge to be that for a 2-ounce letter, and would extend the concept to residual single-piece letters that are part of the same mailing job and presented at the same time as the presorted or automation mailing. There would be a new price for residual letters up to 2 ounces, which would be different than the price for single-piece letters presented as a stand-alone mailing.

Standard Mail® Letters

We propose to add a new price tier for high density letters. In addition to the current high density tier which requires a minimum of 125 pieces per carrier route, the new tier (high density plus) would require a minimum of 300 pieces per carrier route.

Proposed Changes for Flats*Standard Mail Flats*

We propose to add a new price tier for high density flats. In addition to the current high density tier which requires a minimum of 125 pieces per carrier route, the new tier (high density plus) would require a minimum of 300 pieces per carrier route.

Proposed Changes for Letters and Flats*Preparing Residual Mail From First-Class Mail and Standard Mail Mailings*

We propose to revise DMM 235.0, 245.0, 335.0, 345.0, and 705.8.0 to provide new standards for the preparation of pallets, trays, and sacks of First-Class Mail or Standard Mail letters and flats.

The Postal Service continuously reviews the processes and requirements related to the preparation and entry of mail from commercial mailers. In this regard, the Postal Service, working in collaboration with the commercial mailing industry, has identified areas for improved mutual efficiencies from minor changes to its mail preparation standards. These specific revisions were offered by members of the mailing community, adopted and implemented as optional standards in the context of a *Postal Bulletin* article (22344, August 23, 2012), and incorporated into the DMM on September 4, 2012. The Postal Service now presents this proposal to adopt these current options as mandatory preparation standards.

These changes would generally require mailers to place trays or sacks of residual single-piece First-Class Mail letters and flats on an origin sectional center facility (SCF) pallet; and to place trays or sacks of residual Standard Mail letters and flats, paid at the single-piece First-Class Mail prices, on a mixed network distribution center (NDC) pallet. The Postal Service also would require use of new human-readable texts linked to several existing content identifier number (CIN) codes that specifically identify single-piece mailpieces. This would require new text on origin SCF pallet placards, identifying this pallet level as a working pallet; and barcoded labels for trays of residual pieces.

No Additional Entry Fees for Periodicals

We propose changing the designation "additional entry" to "additional mailing offices" and eliminating the fees for Periodicals publications to be mailed in multiple locations. Approved Periodicals would be able to mail at any Post Office™ with *PostalOne!*® access.

Change in Advertising Percentage Allowed for Periodicals Requester Publications

Requester publications will be permitted to exceed 75% advertising in no more than 25% of the issues produced in any 12-month period. This will allow publishers greater advertising flexibility during high advertising volume periods.

Endorsements on Mailing Wrappers for Periodicals

We propose to clarify that the term “mailing wrapper” includes all types of packaging used to enclose Periodicals publications, by adding “carton” to the definition of mailing wrapper. We also extend the return address requirement to pieces that are unendorsed because all Periodicals receive a type of address correction. These revisions will ensure processing the pieces as Periodicals and eliminate the need to open the items when the mailpiece must be forwarded or returned.

Proposed Changes for Parcels

Parcel Post®

Parcel Post has become a competitive product, excluding Alaska Bypass. Parcel Post will only be offered at retail in January 2013, and will be renamed in the near future, pending PRC review. The Postal Service proposes to retain as a market-dominant product the part of our current Parcel Post product that applies to mail currently eligible for Alaska Bypass service, and call the product “Alaska Bypass Service.”

Standard Mail Marketing Parcels, Including Product Samples

Prices for marketing parcels are designed for parcels containing information and/or product samples with the purposes of encouraging recipients to purchase a product or service, make a contribution, support a cause, form a belief or opinion, take an action, or obtain information. Standard Mail Marketing parcels would be mailable at Presorted prices only, except for the new category of Product Samples (also known as Simple Samples), which would be mailable at targeted (similar to the current basic carrier route) or saturation (Every Door) prices. Marketing parcels in general continue to have a maximum size of 12 inches by 9 inches by 2 inches thick.

Product Sample parcels, like other marketing parcels, must be addressed using an alternative addressing format. In addition, each parcel in a mailing of Product Sample parcels must be of identical size and weight. Within each of the price categories—targeted and saturation—there will be separate prices for small samples and for large samples. Targeted parcels must be sorted to carrier routes, with a minimum of one parcel per route. Saturation parcels must bear simplified addresses and be sorted by route. Detached address labels (DALs) must be used with targeted parcels, and there is no additional charge per DAL. DALs are optional with saturation parcels, and there will be an

additional charge for each DAL (including detached marketing labels or DMLs).

Special, Extra, and Other Services

Certificate of Bulk Mailing—Fee Payment

Effective August 6, 2012, the Postal Service revised DMM 503.5 to allow mailers paying postage by permit imprint to report identical weight pieces on PS Form 3606, *Certificate of Bulk Mailing*. For January 2013, the Postal Service proposes to allow mailers paying postage for the pieces reported on a PS Form 3606 by permit imprint to also pay for the fees by permit imprint.

Delivery Confirmation

We would revise the DMM to expand acceptable terminology being allowed for Delivery Confirmation™ service to include *USPS Tracking/Delivery Confirmation*. This would provide clarification to mailers who use privately printed forms, create integrated labels, or who may receive an applicable tracking label affixed to their packages at retail Post Offices, station or branches, that the text is acceptable in either format.

Return Receipts

Current DMM standards permit customers to request proof of delivery via mail, fax, email, or electronically when electronic return receipt is purchased at the time of mailing or via mail, fax, or email when PS Form 3811–A, *Request for Delivery Information/Return Receipt After Mailing* is requested. The Postal Service proposes to restrict the service provided for electronic return receipts purchased at the time of mailing by discontinuing the provision to provide electronic records by fax, mail or on CD-Rom (for Bulk Proof of Delivery) and for return receipts purchased after mailing by discontinuing the provision of providing proof of delivery signature data by fax. Customers would receive proof of delivery signature data by email for electronic return receipts purchased at the time of mailing and by email, or a PS Form 3811–A by mail for return receipts purchased after mailing. Customers will continue to be able to purchase return receipt (PS Form 3811) at the time of mailing and receive the ‘green card’ receipt with delivery signature by mail.

The Postal Service has reviewed data about customer usage of proof of delivery services and the associated system work and time necessary to provide proof of delivery letters by fax,

by mail, or in bulk on CD-Rom. Year-to-date data shows that approximately 95.8% (up from 91.6% last fiscal year) of customers receive the proof of delivery record by email.

Approximately 97.2% of our customers that receive bulk proof of delivery records electronically receive their records weekly via signature extract file format, instead of bi-monthly by CD-Rom. The cost of the CD-Roms are not included in the price of the service, and the additional work required in addition to maintaining the signature extract file format is currently absorbed by the Postal Service.

These revisions would help the Postal Service reduce costs and improve the turnaround time for delivery records to be received by our customers.

Additionally, the Postal Service is considering plans for future enhancements to bulk proof of delivery record exchanges. Any customers having an interest in providing input on the options, or participating in potential testing, may provide their contact information at shippingservices@usps.gov by November 1, 2012.

Registered Mail and COD-Where To File Claims for Indemnity

We are extending the online claims function to allow customers filing claims for indemnity for domestic Registered Mail or COD articles the option of filing online at www.usps.com/insuranceclaims/online.htm.

IMb Tracing™

We are removing language concerning the old Confirm® service from DMM 503.15.0, because all Confirm subscriptions will end by January of 2013. IMb Tracing now provides a service similar to the old Confirm service.

Picture Permit Imprint Indicia

Effective June 24, 2012, the Postal Service introduced picture permit imprint indicia standards allowing customers to include business-related color images, such as corporate logos, company brand, or trademarks, in the permit indicia area on commercial mailings of IMb™ full-service automation First-Class Mail letters and postcards, and of IMb full-service automation Standard Mail automation letters, for a per-piece fee in addition to postage.

For January 2013, we propose to expand picture permit imprint indicia standards to also allow its use on First-Class Mail and Standard Mail flats prepared under the IMb full-service

automation option. Mailers interested in picture permit imprint indicia may contact picturepermit@usps.com by email for more information.

Official Mail (Franked and Penalty)

The Postal Service™ will revise DMM 703.7.0 to remove obsolete standards for the use of official mail such as the need for PS Form 3602–G, references to INTELPOST, and the use of penalty mail stamps.

Advance Notice

The Postal Service is considering the proposal next year of a separate price category for single-piece First-Class Mail metered letters with prices that may be different than other single-piece First-Class Mail letter prices. The Postal Service plans to conduct market research to evaluate various price points for single-piece stamped and metered mail before offering this price differentiation.

Although we are exempt from the notice and comment requirements of the Administrative Procedure Act (5 U.S.C. 553 (b), (c)) regarding proposed rulemaking by 39 U.S.C. 410 (a), we invite public comments on the following proposed revisions to *Mailing Standards of the United States Postal Service*, Domestic Mail Manual (DMM), incorporated by reference in the *Code of Federal Regulations*. See 39 CFR part 111.1.

[Revise the text of 1.2 as follows]

Commercial First-Class Mail Presorted letters are charged at one price for the first 2 ounces, with separate prices for pieces over 2 ounces up to 3 ounces and for pieces over 3 ounces up to 3.5 ounces. Any fraction of an ounce is considered a whole ounce. For example, if a piece weighs 2.2 ounces, the weight (postage) increment is 3 ounces. The pricing per ounce is similar for automation First-Class Mail letters, with pricing differences per sortation level.

Single-piece price letters that are residual pieces from either a Presorted or automation mailing are charged the residual single-piece price for letters up to 2 ounces.

* * * An Enhanced Carrier Route mailing may include pieces at basic, high density, high density plus, and saturation prices.

* * * * *

[Revise the headings of 6.4 and 6.4.1 and the text of 6.4.1 as follows:]

6.4 High Density and High Density Plus (Enhanced Carrier Route) Standards

6.4.1 Basic Eligibility Standards for High Density and High Density Plus Prices

High density and high density plus letter-size mailpieces must be in a full carrier route tray or in a carrier route bundle of 10 or more pieces placed in a 5-digit carrier routes or 3-digit carrier routes tray. High density and high density plus prices for barcoded letters apply to each piece that is automation-compatible according to 201.3.0, and has an accurate delivery point Intelligent Mail barcode (IMb) encoded with the correct delivery point routing code matching the delivery address and meeting the standards in 202.5.0 and 708.4.0. Pieces that are not automation-compatible or not barcoded are mailable only at the applicable high density or high density plus nonautomation letter prices.

[Revise the title and text of 6.4.2 as follows:]

6.4.2 High Density and High Density Plus Prices for Letters

All pieces mailed at high density prices or high density plus must be prepared in walk sequence according to schemes prescribed by the USPS (see 245.6.8 through 245.6.9). Multiple pieces per delivery address can count toward both density standards. Specific density requirements are as follows:

a. Pieces mailed at high density prices must be sorted together in sequence in quantities of at least 125 pieces for each carrier route.

b. Pieces mailed at high density plus prices must be sorted together in sequence in quantities of at least 300 pieces for each carrier route.

[Revise the title and text of 6.4.3 as follows:]

6.4.3 High Density and High Density Plus Discount for Heavy Letters

High density and high density plus pieces that are automation-compatible under 201.3.0, accurately barcoded with a delivery point IMb, and weigh more than 3.3 ounces but not more than 3.5 ounces, require postage equal to the piece/pound price and receive a

discount equal to the high density flat-size piece price (3.3 ounces or less) minus the high density letter piece price (3.3 ounces or less). The discount is calculated using nondestination entry prices only, regardless of entry level. This discount does not apply to pieces requiring nonautomation high density letter or high density plus prices.

Destination entry discount prices are available under 446.2.0 through 446.5.0. Except for Product Samples, pieces are subject to either a single minimum per piece price or a combined piece/pound price, depending on the weight of the individual pieces in the mailing under 4.2 or 4.3. Prices for Product Samples are available under 6.0. Nonprofit prices are available for USPS-authorized organizations under 703.1.0.

* * * * *

4.2 Minimum Per Piece Prices

The minimum per piece prices (i.e., the minimum postage that must be paid for each piece) apply as follows:

[Revise item 4.2a as follows:]

a. Basic Requirement. Except for pieces mailed at Product Sample prices, pieces are subject to minimum per piece prices when they weigh no more than 3.3 ounces (0.2063 pound).

[Delete current item 4.2b, redesignate current item 4.2c as new item 4.2b and revise as follows:]

b. Individual Prices. Except for Product Samples, there are separate minimum per piece prices for each product and, within each product, for the presort and destination entry levels within each mailing. There are also separate prices for Marketing parcels, Nonprofit machinable parcels, and Nonprofit irregular parcels. Under Marketing parcels, there are separate prices for Product Samples.

4.3 Piece/Pound Prices

[Revise the text of 4.3 as follows:]

Except for Product Samples, pieces that exceed 3.3 ounces are subject to a two-part piece/pound price that includes a fixed charge per piece and a variable pound charge based on weight. There are separate per piece prices for each product, and within each product, for the type of mailing and the presort and destination entry levels within each

mailing. There are separate per pound prices for each product.

d. Pieces mailed at Product Sample prices.

* * * * *

5.0 Additional Eligibility Standards for Presorted Standard Mail Pieces

* * * * *

5.2 Price Application

[Revise the text of 5.2 as follows:]

Prices for Standard Mail and Nonprofit Standard Mail apply separately to Marketing parcels (and within Marketing parcels, to Product Samples) that meet the eligibility standards in 2.0 through 4.0 and the applicable preparation standards in 445.5.0, 705.6.0, 705.8.0, or 705.22. Prices for Nonprofit parcels not qualifying as Marketing parcels apply separately to machinable parcels and irregular parcels. When parcels are combined (except for Product Samples, which cannot be combined with other parcels) under 445.5.0, 705.6.0, or 705.22, all pieces are eligible for the applicable prices when the combined total meets the eligibility standards.

* * * * *

[Revise the title and the standards within 6.0 as follows:]

6.0 Additional Eligibility Standards for Marketing Parcels Mailed as Product Samples

6.1 General Product Sample Standards

6.1.1 Basic Standards and Optional Preparation

Product Samples are a type of Marketing parcels, and must be sorted to carrier routes. See 401.2.4.2 for physical standards and 443.3.0 for basic standards.

Preparation to qualify for any Product Sample price is optional and need not be performed for all carrier routes in a

5-digit area. A Product Sample mailing may include pieces mailed at targeted prices and pieces mailed at saturation (Every Door) prices, but all pieces in a mailing must be identical in size and weight. All mailings of Product Samples must be entered under DNDC, DSCF, or DDU standards (see 446). No origin office entry of Product Samples is allowed.

6.1.2 Pricing for Product Samples

See Notice 123-Price List for price tables. Product Samples (or samples and DALs) must be sorted to carrier routes, including delivery routes and Post Office Box sections. Product Sample mailings are subject to per piece prices and, when not entered at a DDU, are subject to carton/sack and/or pallet prices. Piece prices are different for parcels sorted to the Targeted level (6.3) than for parcels sorted to the saturation level (6.4). Within each sortation level, piece prices are different for small parcels than for large parcels (see 401.2.4.2). Prices for cartons (or sacks) and pallets are subject to the following conditions:

- a. A pallet charge applies to each pallet of Product Samples entered at a DNDC or DSCF, except 3-digit pallets properly entered at a DSCF.
- b. A carton or sack charge applies to each carton or sack of Product Samples on a 3-digit pallet. Each carton must not exceed 40 pounds nor exceed a combined length and girth of 108 inches.

6.1.3 Basic Eligibility Standards

All parcels in a mailing of Product Samples must bear an alternative addressing format under 602.3.0. Parcels mailed at saturation prices must bear a simplified address. In addition, all Product Sample parcels must:

- a. Meet the basic standards for Standard Mail in 2.0 through 4.0.
- b. Be part of a single mailing of at least 200 pieces or 50 pounds of parcels mailed at Product Sample prices. Regular and Nonprofit mailings must meet separate minimum volumes.
- c. Be sorted to carrier routes and documented under 445.6.0 and 705.8.0, as applicable.
- d. Bear a delivery address that includes the correct ZIP Code, ZIP+4 code, or numeric equivalent to the delivery point barcode and that meets the carrier route accuracy standard in 6.2.
- e. Meet the applicable sequencing requirements in 6.3 through 6.5 and in 445.6.6.

6.2 Carrier Route Accuracy

6.2.1 Basic Standards

The carrier route accuracy standard is a means of ensuring that the carrier route code correctly matches the delivery address information on detached address labels (DALs) used with Product Samples mailed at targeted prices. For the purposes of this standard, *address* means a specific address associated with a specific carrier route code. This standard does not apply to pieces with simplified addresses. Addresses used on pieces subject to the carrier route accuracy standard must meet these requirements:

- a. Each address and associated carrier route code used on the pieces in a mailing must be updated within 90 days before the mailing date with one of the USPS-approved methods in 6.2.2.
- b. If the carrier route code of an address used on a piece in a carrier route mailing at one class of mail and price is updated with an approved method, the same address may be used during the following 90 days to meet the carrier route accuracy standard required for mailing at any other class of mail and price.

6.2.2 USPS-Approved Methods

Carrier route coding must be performed using CASS-certified software and the current USPS Carrier Route Product or another Address Information System (AIS) product containing carrier route information subject to 509.1.0 and 708.3.0.

6.2.3 Mailer Certification

The mailer's signature on the postage statement certifies that the carrier route accuracy standard has been met for each address in the corresponding mailing presented to the USPS.

6.3 Additional Standards for Targeted Product Samples

6.3.1 Sequencing

All parcels mailed at targeted prices must be accompanied with detached address labels (DALs) prepared in walk sequence (see 445.6.6). The combined weight of the DAL and associated sample must be less than 1 pound; there are no additional fees for use of DALs with pieces mailed at targeted prices.

6.3.2 Basic Preparation for Targeted Prices

Targeted prices apply to each parcel in a carrier route sack or carton containing at least 1 piece per carrier route, prepared under 445.6.0. There are separate targeted prices for small parcels and for large parcels (see 401.2.4.2).

DALs must be in carrier route bundles and prepared under 602.4.0.

6.4 Additional Standards for Saturation (Every Door) Product Samples

6.4.1 Basic Eligibility Standards for Saturation Prices

All parcels in a mailing at saturation prices must bear simplified addresses (or be accompanied by DALs bearing simplified addresses), and the mailing must meet the saturation standards for simplified addressed pieces under 602.3.0. For DAL charges, see Notice 123—Price List.

6.4.2 Basic Preparation for Saturation Prices

Saturation prices apply to each parcel in a carrier route sack or carton of simplified addressed pieces, or as allowed in bundles on pallets under 445.6.0. If used, DALs must be in carrier route bundles and prepared under 602.4.0.

2.2 Nonidentical-Weight Pieces

[Revise the text of 2.2 as follows:]

Product Samples must be of identical weight within each mailing. Postage for other nonidentical-weight parcels may be paid by precanceled stamps, subject to 4.0 and 604.3.0. Mailings of nonidentical-weight pieces subject to the piece/pound prices may have postage paid by permit imprint (if the mailer is authorized by Business Mailer Support) or by meter (if each piece has the full postage affixed). Alternatively, the mailer may affix the per piece price to each piece and pay the pound price for the mailing through an advance deposit account. Under this option, the mailer must provide a postage statement for each payment method and mark each piece "Pound Price Pd via Permit" in the postage meter indicium. For mailings of nonidentical-weight pieces, "nonidentical" must be shown as the weight of a single piece on the postage statement.

1.3 Terms for Presort Levels

Terms used for presort levels are defined as follows:

[Revise item 1.3a as follows:]

a. *Targeted (Product Samples)*: a type of Marketing parcel that is sorted to (and marked as) the carrier route level, with a minimum of one piece per carrier route. * * * * *

2.0 Bundles

2.1 General

[Revise the text of 2.1 as follows:]

A *bundle* is a group of addressed pieces for a presort destination secured together as a unit. Bundling is permitted only for Marketing parcels mailed at Product Sample prices and prepared on 5-digit/L606 pallets, and for related DALs when used. Bundles must be in equal quantities of up to 50 parcels per bundles, with quantities of other than 50 indicated on a bundle facing slip. Bundles must be either banded or shrinkwrapped, and bundles of pieces more than 8 ounces each must be banded and shrinkwrapped. See 601.2.0 for other bundling standards.

[Revise the title of 2.2 as follows:]

2.2 Facing Slips—Product Samples

[Revise the introductory text and item b of 2.2 as follows:]

Facing slips used on bundles of Product Sample parcels must show the quantity in the bundle if less than 50 and this information:

* * * * *

[Revise item 6.1b as follows:]

6.2 Marking

[Revise the text of 6.2 as follows:]

All Enhanced Carrier Route pieces must be marked under 402.2.0. All pieces must be marked “ECRLLOT” for pieces claiming a Targeted price, or “ECRWSS” for pieces claiming a saturation (Every Door) price.

6.3 Residual Pieces

[Revise the text of 6.3 as follows:]

Parcels not prepared or sorted as a carrier route mailing at Product Sample prices must be prepared as a separate mailing at Standard Mail Presorted prices.

6.4 Bundling

6.4.1 Carrier Route Bundle Preparation

[Revise the text of 6.4.1 as follows:]

Prepare carrier route bundles as follows:

a. Sacks must contain at least 15 pounds or 125 pieces of mail, except under

6.4.2. Cartons may be used instead of sacks. Cartons have no minimum weight, must not weigh more than 40 pounds, and must not exceed 108 inches in combined length and girth.

b. DALs are required for parcels mailed at targeted prices; mailers must prepare carrier route bundles of DALs. Parcels must be prepared in sacks or cartons labeled to the correct 5-digit/L606 destination, and bundled under 2.0 and the same bundling standards as for saturation parcels under 6.4.1c. Prepare bundles of DALs and bundles of samples in the same carton or sack, with the bundles of DALs on the top. See 602.4.0 for additional preparation standards for parcels and accompanying DALs, including optional pallet preparation.

c. DALs are optional for parcels mailed at saturation prices. Parcels must be prepared in sacks or cartons labeled to carrier routes, and bundled under 6.4.1c and 2.0. When DALs are used, they must be prepared in carrier route bundles and placed in the same carton or sack as the samples for the corresponding route. Saturation parcels must be bundled in quantities of 50 or less under 2.0, and the bundles placed on 5-digit/L606 pallets in a stable manner. As an option, bundled saturation parcels without accompanying DALs may be prepared in sacks or cartons labeled to carrier routes.

[Revise the title and the first sentence of 6.4.2 as follows:]

As a general exception to 6.4.1 and 6.5.1, mailers may prepare a sack with fewer than 125 pieces or less than 15 pounds of pieces to a carrier route when they are claiming the saturation price for the contents and the applicable density standard is met. * * *

[Add new 6.5.3 as follows:]

6.5.3 Required Palletization

Do not use pallets when the Drop Shipment Product indicates the delivery unit that serves the 5-digit pallet destination cannot

handle pallets. For such delivery units, mail with DALs must be prepared in cartons or sacks. The tray(s) of corresponding DALs must be placed on top of the accompanying pallet of flats, and the pallet contents must be secured with stretchwrap to avoid separation in transportation and processing. All containers must be labeled according to 4.3.5.
