Specified Activities

In the application submitted to NMFS, SDOT requests authorization to take marine mammals incidental to replacement of the Elliott Bay Seawall. Construction activities, namely vibratory and impact pile installation and removal, would occur in two phases. Phase 1 involves construction of the Central Seawall and Phase 2 involves construction of the North Seawall. The entire project is expected to take 7 years, but SDOT's request covers the first 5 years. Section 2 of SDOT's application describes the activities in detail, as well as the location and construction schedule.

Information Sought

Interested persons may submit information, suggestions, and comments concerning SDOT's request (see ADDRESSES). All information, suggestions, and comments related to SDOT's request and NMFS' potential development and implementation of regulations governing the incidental taking of marine mammals by SDOT's activities will be considered by NMFS in developing, if appropriate, the most effective regulations governing the issuance of letters of authorization.
