Consultation

A detailed assessment of the human remains was made by the professional staff in the Maxwell Museum's Laboratory of Human Osteology in consultation with representatives of the Pueblo of Jemez, New Mexico.

History and Description of the Remains

Between 1934 and 1935, human remains representing, at minimum, one individual were removed from the Jemez Cave site in Sandoval County, NM, by directors of the University of New Mexico Field School and eight laborers. The Museum of New Mexico, the School of American Research, and the University of New Mexico supported the project and the excavation. The human remains were accessioned by the Maxwell Museum in 1990. No known individuals were identified. No associated funerary objects are present.

In the early 1900s, human remains representing, at minimum, seven individuals were removed from the Amoxiumqua site (LA 481), in Sandoval County, NM, during excavations by

University of New Mexico field schools. The human remains were accessioned by the Maxwell Museum in 1973. No known individuals were identified. No associated funerary objects are present.

Between 1939 and 1949, human remains representing, at minimum, 22 individuals were removed from the BJ 74 site (LA 38962), in Sandoval County, NM, during excavations by Paul Reiter and students from the University of New Mexico. The human remains were accessioned by the Maxwell Museum in 2006. No known individuals were identified. No associated funerary objects are present.

The sites listed in this notice are Puebloan sites of the upper Jemez River drainage and are ancestral Jemez sites.
