SUPPLEMENTARY INFORMATION:

Background

On August 3, 2012, we published in the *Federal Register* (77 FR 46339–46340, Docket No. APHIS–2012–0001), an advance notice of proposed rulemaking (ANPR) to solicit public comment on whether and how we should amend our process for responding to domestic chrysanthemum white rust (CWR) outbreaks and the importation of plant material that is a host of CWR. CWR is an economically important disease in both field-grown and greenhouse-grown chrysanthemum plants, as well as cut flower production.

The ANPR specifically asks for comments regarding four options under consideration. These options are: Continuing to manage CWR as a quarantine pest with the objective of continuing to eradicate new infestations; revising the current regulations to designate CWR as a regulated non-quarantine pest; no longer managing CWR as a quarantine pest whose presence requires an eradication-oriented response, but maintaining port of entry restrictions for chrysanthemums destined to those States where CWR is not present and where these States have established an official control program under the Federally Recognized State-Managed Phytosanitary Program; or completely removing CWR as a quarantine pest whose presence requires an eradication-oriented response.

Comments on the ANPR were required to be received on or before October 2, 2012. We are reopening the comment period on Docket No. APHIS–2012–0001 for an additional 30 days. This action will allow interested persons additional time to prepare and submit comments. We will also accept comments received between October 3, 2012 (the day after the close of the original comment period) and the date of this notice.

Done in Washington, DC, this 25th day of October 2012.

Section 610 Reviews of Heavy-Duty Engine and Vehicle Standards and Highway Diesel Fuel Sulfur Control Requirements; NESHAP: Reinforced Plastic Composites Production; and NPDES Permit Regulation and Effluent Limitations Guidelines Standards for Concentrated Animal Feeding Operations (CAFOs)

AGENCY: Environmental Protection Agency (EPA).

ACTION: Request for comments on three Regulatory Flexibility Act section 610 Reviews.

SUMMARY: This notice announces that EPA will review three regulatory actions pursuant to section 610 of the Regulatory Flexibility Act. Those three actions are: Heavy-Duty Engine and Vehicle Standards and Highway Diesel Fuel Sulfur Control Requirements (Heavy-Duty 610 Review); NESHAP: Reinforced Plastic Composites Production (Plastics 610 Review); and NPDES Permit Regulation and Effluent Limitations Guidelines Standards for CAFOs (CAFO 610 Review). As part of this review, EPA will consider and solicit comments on the following factors: The continued need for the rules; the nature of complaints or comments received concerning the rules; the complexity of the rules; the extent to which the rules overlap, duplicate, or conflict with other Federal, State, or local government rules; and the degree to which the technology, economic conditions or other factors have changed in areas affected by the rules.
