

to receive a larger share of consumer's food dollar. Farmers markets allow consumers to have access to locally grown farm fresh produce; enables farmers the opportunity to develop a personal relationship with their customers; and cultivate consumer loyalty with the farmers. They are also playing an increasing role in encouraging healthier eating.

A farmers market operates multiple times per year and is organized for the purpose of facilitating personal connections that create mutual benefits for local farmers, shoppers and communities. To fulfill that objective, farmers markets define the term local, regularly communicate that definition to the public, and implement rules/guidelines of operation that ensure that the farmers market consists principally of farms selling directly to the public products that the farms have produced.

An on-farm market is an area of a facility affiliated with a farm where transactions between a farm market operator and customers take place. A farm market may operate seasonally or year-round. Farm markets are an important component of direct marketing, adding value by offering customers a visit to the farm and the opportunity to purchase products from the people who grew them.

Community Supported Agriculture (CSA) is another type of food-production and direct marketing relationship between a farmer or farmers and a group of consumers who purchase "shares" of the season's harvest in advance of the growing season. The up-front working capital generated by selling shares reduces the financial risk to the farmer(s). Generally farmers receive better prices for their crops and, reduced marketing costs. Consumers benefit by receiving weekly delivery of fresh locally-grown fruits, vegetables, meats, eggs and other produce. They also benefit from the ability to collectively support the sustainability of local farmers.

Currently, the USDA farmers market survey is conducted every 4 years and collects information concerning farmers market characteristics. The USDA also collects data on an annual basis to update its listing in the web-based National Farmers Market Directory. There was an overlap in the information that is collected through these two efforts. The revised survey, which will be web-based and data-driven, will collect information not only about farmers markets, but also on on-farm markets and CSAs.

This information that the modified survey collects will be used to update the Directory and also to describe the

characteristics of farmers markets, CSAs and on-farm markets and to identify trends in their communities.

Modifying the survey to simultaneously collect information for multiple purposes will increase response rates, reduce duplicity in information collected by respondents, and to add convenience to respondents.

Information currently collected as part of USDA annual Directory update will be incorporated as part of the revised farmers market instrument. Additional questions, related to on-farm markets and CSAs, will be added to the survey. The web-based survey will incorporate an advanced GIS mapping capability, the ability to immediately stratify the respondents and direct them to the survey modules relevant to their characteristics.

Topic areas in the survey:

- Characteristics and history of farmers markets, on-farm markets and CSAs
- Types of products sold, including fresh, locally-grown produce
- Location of the markets
- Programs to encourage healthy eating
- Special events
- Marketing methods
- Participation in federal programs designed to increase consumption of fresh fruits and vegetables.
- Vendor retention and recruitment
- Market growth and enhancement
- Contribution to economic development
- Awareness and participation in grant and educational programs
- What information do farmers market managers have or how do they derive estimates of number of customers, sales, number of vendors, and vendor characteristics

Estimate of Burden: Public reporting burden for this collection of information is estimated to average 0.317 hours per response.

Respondents: Farmers Market Managers, Operators of Community Supported Agriculture (CSA's), farm operations, farm operators that operate on farm stores.

Estimated Number of Respondents: 64,364.

Estimated Total Annual Responses: 6,000.

Abstract

The American Recovery and Reinvestment Act of 2009 (the "Recovery Act"), Congress appropriated \$2.5 billion of budget authority for establishing the Broadband Initiatives Program (BIP) which may extend loans, grants, and loan/grant combinations to facilitate broadband deployment in rural areas. In facilitating the expansion of advanced communications services and infrastructure, the program will advance the objectives of the Recovery Act to spur job creation and stimulate long-term economic growth and opportunity.

The collection of information for this program is vital to RUS to ensure compliance with the provisions of this Notice and to fulfill the requirements of the Recovery Act. In summary, the collection of information is necessary in order to implement this program.

1. Reporting and Registration Requirement Under Section 1512 of the Recovery Act

a. This award requires the recipient to complete projects or activities which are funded under the Recovery Act and to report on use of Recovery Act funds provided through this award. Information from these reports will be made available to the public.

b. The first report is due no later than ten calendar days after the initial calendar quarter in which the recipient receives the assistance award funded in

whole or in part by the Recovery Act, or by October 10, 2009. Thereafter, reports shall be submitted no later than the tenth day after the end of each calendar quarter.

c. Recipients and their first-tier recipients must maintain current registrations in the CCR (<http://www.ccr.gov>) at all times during which they have active federal awards funded with Recovery Act funds. A DUNS number is one of the requirements for registration in the CCR.

d. The recipient shall report the information described in section 1512(c) using the reporting instructions and data elements that will be provided online at <http://www.FederalReporting.gov>, unless the information is pre-populated.

2. Agencies' Additional Paperwork Reduction Act Analysis

Copies of all forms, regulations, and instructions referenced in this NOFA may be obtained from RUS. Data furnished by the applicants will be used to determine eligibility for program benefits. Furnishing the data is voluntary; however, the failure to provide data could result in program benefits being withheld or denied.

The following estimates are based on the average over the past three years the program has been in place.

Title: Broadband Initiatives Program (BIP).

OMB Control Number: 0572-0142.

Type of Request: Revision of a currently approved information collection.

Estimate of Burden: Public reporting burden for this collection of information is estimated to average 3.5 hours per response.

Respondents: Business or other for profits; not-for-profit institutions; and State, local, and Tribal.

Estimated Number of Respondents: 282.

Estimated Number of Responses per Respondent: 1.5.

Estimated Number of Responses: 1,995.

Estimated Total Annual Burden (hours) on Respondents: 6,905.

All responses to this notice will be summarized and included in the request for OMB approval. All comments will also become a matter of public record.

Dated: October 26, 2012.
