

allocations differ for particular loan categories as economic conditions change. Furthermore, all institutions with \$1 billion or more in total assets are subject to regulations requiring them to prepare annual financial statements in accordance with U.S. generally accepted accounting principles.²

Accordingly, such institutions should have processes in place to develop the disaggregated ALLL data required to be disclosed by ASU 2010–20, which are comparable to the data specified by Schedule RI–C as modified in response to comments.

To allow institutions sufficient lead time to make any necessary adjustments to their data systems to report this modified disaggregation of their ALLL and the related recorded investment amounts by loan category and impairment measurement method, the agencies will delay implementation of new Schedule RI–C until the March 31, 2013, report date.

Consistent with longstanding practice, for the March 31, 2013, report date, institutions may provide reasonable estimates for any Call Report Schedule RI–C item for which the requested information is not readily available.

Proposed Schedule RC–U—The FFIEC and the agencies have not yet completed their evaluation of this proposed new schedule in light of the comments received. When the FFIEC and the agencies have decided whether and how to proceed with Schedule RC–U, their decision will be addressed in a future **Federal Register** notice and, if applicable, submissions by the agencies will be made to OMB. To allow sufficient lead time for affected institutions to prepare for any resulting new reporting requirements for loan origination data, the collection of such data would not take effect before the June 30, 2013, report date.

AGENCY: Bureau of the Public Debt, Fiscal Service, Treasury.

ACTION: Notice.

SUMMARY: The Department of the Treasury (Treasury) is announcing a new fee schedule applicable to transfers of U.S. Treasury book-entry securities maintained on the National Book-Entry

System (NBES) that occur on or after January 2, 2013.

FOR FURTHER INFORMATION CONTACT: Kristina Yeh, Bureau of the Public Debt, 202–504–3550.

SUPPLEMENTARY INFORMATION: Treasury has established a fee structure for the transfer of Treasury book-entry securities maintained on NBES. Treasury reassesses this fee structure periodically, based on our review of the latest book-entry costs and volumes.

For each Treasury securities transfer or reversal sent or received on or after January 2, 2013, the basic fee will increase from \$0.48 to \$0.56. The Federal Reserve will maintain its fee for Federal Reserve funds movement at \$0.09. This will result in a combined fee of \$0.65 for each transfer of Treasury book-entry securities. The surcharge for an off-line Treasury book-entry securities transfer will remain at \$40.00. Off-line refers to the sending and receiving of transfer messages to or from a Reserve Bank by means other than on-line access, such as by written, facsimile, or telephone voice instruction. The basic transfer fee assessed to both sends and receives is reflective of costs associated with the processing of securities transfers. The off-line surcharge reflects the additional processing costs associated with the manual processing of off-line securities transfers.

Treasury does not charge a fee for account maintenance, the stripping and reconstitution of Treasury securities, the wires associated with original issues, or interest and redemption payments. Treasury currently absorbs these costs.

The fees described in this notice apply only to the transfer of Treasury book-entry securities held on NBES. Information concerning fees for book-entry transfers of Government Agency securities, which are priced by the Federal Reserve System, is set out in a separate **Federal Register** notice published by the Board of Governors of the Federal Reserve System.
