Office of the Secretary

Agency Information Collection Activities; Submission for OMB Review; Comment Request: Main Fan Operation and Inspection (I–A, II–A, III, and V–A Mines)

ACTION: Notice.

SUMMARY: The Department of Labor (DOL) is submitting the Mine Safety and Health Administration (MSHA)

sponsored information collection request (ICR) titled, "Main Fan Operation and Inspection (I–A, II–A, III, and V–A Mines)," to the Office of Management and Budget (OMB) for review and approval for continued use in accordance with the Paperwork Reduction Act (PRA) of 1995 (44 U.S.C. 3501 et seq.).

DATES: Submit comments on or before December 17, 2012.

ADDRESSES: A copy of this ICR with applicable supporting documentation; including a description of the likely respondents, proposed frequency of response, and estimated total burden may be obtained from the RegInfo.gov Web site, http://www.reginfo.gov/public/do/PRAMain, on the day following publication of this notice or by contacting Michel Smyth by telephone at 202–693–4129 (this is not a toll-free number) or sending an email to DOL_PRA_PUBLIC@dol.gov.

Submit comments about this request to the Office of Information and Regulatory Affairs, Attn: OMB Desk Officer for DOL–MSHA, Office of Management and Budget, Room 10235, 725 17th Street, NW., Washington, DC 20503, Fax: 202–395–6881 (this is not a toll-free number), email: OIRA submission@omb.eop.gov.

Authority: 44 U.S.C. 3507(a)(1)(D).

SUPPLEMENTARY INFORMATION:

Potentially gassy (explosive) conditions underground are largely controlled by main fans. When accumulations of explosive gases, such as methane, are not swept from the mine by the main fans, they may reasonably be expected to contact an ignition source. The results of such contacts are usually disastrous, and multiple fatalities may be reasonably expected to occur. The Main Fan Operation and Inspection standard contains significantly more stringent requirements for main fans in gassy mines than for main fans in other mines. Regulations 30 CFR 57.22204, which only applies to gassy metal and nonmetal underground mines, requires main fans to have pressure-recording systems. The standard also requires main fans to be inspected daily while operating if persons are underground and certification made of such inspections by signature and date. Certifications and pressure recordings must be retained for one year and made available to authorized representatives of the Secretary.

This information collection is subject to the PRA. A Federal agency generally

cannot conduct or sponsor a collection of information, and the public is generally not required to respond to an information collection, unless it is approved by the OMB under the PRA and displays a currently valid OMB Control Number. In addition, notwithstanding any other provisions of law, no person shall generally be subject to penalty for failing to comply with a collection of information if the collection of information does not display a valid Control Number. See 5 CFR 1320.5(a) and 1320.6. The DOL obtains OMB approval for this information collection under Control Number 1219-0030. The current approval is scheduled to expire on January 31, 2013; however, it should be noted that existing information collection requirements submitted to the OMB receive a month-to-month extension while they undergo review. For additional information, see the related notice published in the **Federal Register** on July 17, 2012 (77 FR 42004).

Interested parties are encouraged to send comments to the OMB, Office of Information and Regulatory Affairs at the address shown in the ADDRESSES section within 30 days of publication of this notice in the Federal Register. In order to help ensure appropriate consideration, comments should mention OMB Control Number 1219–0030. The OMB is particularly interested in comments that:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

SUPPLEMENTARY INFORMATION:

I. Meeting

OSHA is hosting an open informal public meeting of the U.S. Interagency GHS Coordinating Group to provide interested groups and individuals with an update on GHS-related issues and an opportunity to express their views orally and in writing for consideration in developing U.S. Government positions for the upcoming UNSCEGHS meeting. The public is invited to attend without prior notification.

The Meeting Agenda, in general, is as follows:

- Discussion of working papers for the 24th Session of the UNSCEGHS
- Update on UNSCEGHS correspondence group activity
- Discussion of the program of work for the 2013–2014 biennium

II. Background

The GHS was formally adopted by the United Nations Committee of Experts on the Transport of Dangerous Goods and on the Globally Harmonized System of Classification and Labelling of Chemicals in December 2002. The GHS is a single, harmonized system for classification of chemicals according to their health, physical, and environmental effects. It also provides harmonized communication elements, including labels and safety data sheets. The GHS is considered to be a living document and is regularly revised and updated as necessary to reflect new technology and scientific developments or to provide additional explanatory text. OSHA incorporated the GHS 3rd revision into its Hazard Communication Standard on March 26th of this year, 77 FR 17574, and intends to update the standard from time to time through rulemaking in order to remain consistent with any revisions to the GHS as appropriate under the OSH Act.

The UNSCEGHS is responsible for maintaining and updating the GHS. The U.S. has been an active member of the UNSCEGHS for many years, and OSHA currently serves as the head of the U.S. delegation for this Sub-committee.

In preparation for the bi-annual meetings of the UNSCEGHS, the U.S.

Interagency GHS Coordinating Group meets to discuss issues related to the GHS and to develop a coordinated U.S. position on issues and proposals regarding the GHS. The U.S. Interagency Coordinating Group consists of U.S. agencies that regulate in the area of chemical hazard communication and includes the Department of Transportation (DOT), the Environmental Protection Agency (EPA), the Consumer Product Safety Commission (CPSC), and OSHA.

Information on the work of the UNSCEGHS, including meeting agendas, reports, and documents from previous sessions, can be found on the United Nations Economic Commission for Europe (UNECE) Transport Division Web site located at the following web address: http://www.unece.org/trans/danger/publi/ghs/ghs_welcome_e.html. The UNSCEGHS bases its decisions on Working Papers. The Working Papers for the 24th session of the UNSCEGHS are located at http://www.unece.org/trans/main/dgdb/dgsubc4/c42012.html.

Informal Papers submitted to the UNSCEGHS provide information for the subcommittee and are used either as a mechanism to provide information to the subcommittee or as the basis for future Working Papers. Informal Papers for the 24th session of the UNSCEGHS are located at: http://www.unece.org/trans/main/dgdb/dgsubc4/c4inf24.html.
