

## The Proposal

This action proposes to amend Title 14, Code of Federal Regulations (14 CFR), Part 71 by amending Class E airspace extending upward from 700 feet above the surface to accommodate new standard instrument approach procedures at Hot Springs Municipal Airport, Hot Springs, SD. Controlled airspace is needed for the safety and management of IFR operations at the airport. The airport's geographic coordinates also would be updated to coincide with the FAA's aeronautical database.

Class E airspace areas are published in Paragraph 6005 of FAA Order 7400.9W, dated August 8, 2012 and effective September 15, 2012, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designation listed in this document would be published subsequently in the Order.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore, (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a Regulatory Evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

The FAA's authority to issue rules regarding aviation safety is found in Title 49 of the U.S. Code. Subtitle 1, Section 106 describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority. This rulemaking is promulgated under the authority described in Subtitle VII, Part A, Subpart I, Section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This regulation is within the scope of that authority as it would amend controlled airspace at Hot Springs Municipal Airport, Hot Springs, SD.

## Environmental Review

This proposal will be subject to an environmental analysis in accordance with FAA Order 1050.1E, "Environmental Impacts: Policies and Procedures" prior to any FAA final regulatory action.

*Withdrawal of the proposal:* On June 22, 2012, OSHA published a direct-final rule to update the incorporated references in its Head Protection standards for general industry at 29 CFR 1910.135, shipyard employment at 29 CFR 1915.155, marine terminals at 29 CFR 1917.93, longshoring at 29 CFR 1918.103, and construction at 29 CFR 1926.100 (77 FR 37587). OSHA also published a companion proposed rule along with the direct-final rule (77 FR 37617). In the direct-final rule, OSHA stated that it would withdraw the companion proposed rule and confirm the effective date of the direct-final rule

if it received no significant adverse comments on the direct-final rule by July 23, 2012. OSHA received two comments on the direct-final rule by that date, neither of which were significant adverse comments (see Document IDs OSHA-2011-0184-0003 and -0004). To the contrary, both comments supported the direct final rule.

OSHA is publishing a notice announcing this determination and confirming the effective date of the direct-final rule as September 20, 2012. Accordingly, OSHA is not proceeding with the proposed rule, and is withdrawing it from the rulemaking process.
