#### SUPPLEMENTARY INFORMATION:

##### I. Background

Attachment to the labor force, usually measured as amount of past wages earned, is used to determine eligibility for state unemployment compensation programs. The data in the ETA 218, Benefit Rights and Experience Report, includes numbers of individuals who were and were not monetarily eligible, those eligible for the maximum benefits, those eligible based on classification by potential duration categories, and those exhausting their full entitlement as classified by actual duration categories. These data are used by the National Office in solvency studies, cost estimating and modeling, and assessment of state benefit formulas.

##### II. Review Focus

The Department is particularly interested in comments which:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submissions of responses.
