I. Executive Summary

Reforms to address the structural vulnerabilities of money market mutual funds (MMFs or funds) are essential to safeguard financial stability. MMFs are mutual funds that offer individuals, businesses, and governments a convenient and cost-effective means of pooled investing in money market instruments. MMFs are a significant source of short-term funding for businesses, financial institutions, and governments. However, the 2007-2008 financial crisis demonstrated that MMFs are susceptible to runs that can have destabilizing implications for financial markets and the economy. In the days after Lehman Brothers Holdings, Inc. failed and the Reserve Primary Fund, a \$62 billion prime MMF, "broke the buck," investors redeemed more than \$300 billion from prime MMFs and commercial paper markets shut down for even the highest-quality issuers. The Treasury Department's guarantee of more than \$3 trillion of MMF shares and a series of liquidity programs introduced by the Federal Reserve were needed to help stop the run on MMFs during the financial crisis and ultimately helped MMFs to continue to function as intermediaries in the financial markets.

The Securities and Exchange Commission (SEC) took important steps in 2010 by adopting regulations to improve the resiliency of MMFs (the "2010 reforms"). But the 2010 reforms did not address the structural vulnerabilities of MMFs that leave them susceptible to destabilizing runs. These vulnerabilities arise from MMFs' maintenance of a stable value per share and other factors as discussed below. MMFs' activities and practices give rise to a structural vulnerability to runs by
