

removed from the HCP. Volume I of the FEIS incorporates all changes to the text, tables, and figures that were completed following the public review and comment period.

The FEIS analyzes three alternatives including the issuance of ITPs and the implementation of the proposed HCP described above. The issuance of 50-year take permits and Applicant implementation of the proposed HCP is considered the Preferred Alternative. Two other alternatives being considered by the Services include the following:

Under the No Action Alternative, the Services would not issue incidental take permits for implementation of the HCP. As a result, the Applicant would likely seek individual incidental take authorization as needed for new projects and ongoing operations that would result in the take of federally listed species.

Under the California Tiger Salamander Only Alternative, Stanford would prepare a HCP only for the California tiger salamander, and obtain section 10 authorization only for the take of California tiger salamander. Future development and ongoing activities that would result in the take of other listed species would be permitted individually, as needed.

Public Comments

The Services invite the public to review the final HCP, final IA, and FEIS during a 30-day public waiting period [see **DATES** and **SUPPLEMENTARY INFORMATION**]. All comments and materials received, including names and addresses, will become part of the administration record and may be released to the public. Our practice is to make comments, including names, home addresses, home telephone numbers, and email addresses of respondents available for public review. Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you may ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so. This notice is provided pursuant to section 10(c) of the ESA and regulations for implementing NEPA, as amended (40 CFR 1506.6). We provide this notice in order to allow the public, agencies, or other organizations to review and comment on these documents.

Next Steps

The Services will evaluate the applications, associated documents, and public comments submitted to them to prepare their respective Records of Decision (RODs). Any comments received during this 30-day period will be considered during the Services' decision-making process. A permit decision will be made no sooner than 30 days after the publication of EPA's notice of the FEIS and completion of the RODs.

Dated: November 5, 2012.

Richard Kearney,

Acting Deputy Regional Director, Pacific Southwest Region, Sacramento, California, U.S. Fish and Wildlife Service.

Dated: November 13, 2012.

Angela Somma,

Chief, Endangered Species Division, Office of Protected Resources, National Marine Fisheries Service.

Fisheries of the Gulf of Mexico; Southeast Data, Assessment, and Review (SEDAR); Public Meetings

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of Cancellation of SEDAR 28 Gulf of Mexico Spanish mackerel and cobia assessment Webinar.

SUMMARY: The SEDAR 28 assessment of the Gulf of Mexico Spanish mackerel and cobia fisheries will consist of a series of workshops and supplemental Webinars. This notice is for a Cancellation of a Webinar associated with the Assessment portion of the SEDAR process. See **SUPPLEMENTARY INFORMATION**.

DATES: The SEDAR 28 Assessment Workshop Webinar scheduled to be held on November 26, 2012, from 1 p.m. until 5 p.m. EDT has been cancelled.

FOR FURTHER INFORMATION CONTACT: Ryan Rindone, SEDAR Coordinator, 2203 N. Lois Ave., Suite 1100, Tampa FL 33607; telephone: (813) 348-1630; email: ryan.rindone@gulfcouncil.org.

SUPPLEMENTARY INFORMATION: The original notice published in the **Federal Register** on November 7, 2012 (77 FR 66818).

The Gulf of Mexico Fishery Management Council (GMFMC), in conjunction with NOAA Fisheries, has implemented the Southeast Data, Assessment and Review (SEDAR) process, a multi-step method for determining the status of fish stocks in the Southeast Region. SEDAR is a three-step process including: (1) Data Workshop; (2) Assessment Process, including a workshop and Webinars; and (3) Review Workshop. The product of the Data Workshop is a data report which compiles and evaluates potential datasets and recommends which datasets are appropriate for assessment analyses. The product of the Assessment Process is a stock assessment report which describes the fisheries, evaluates the status of the stock, estimates biological benchmarks, projects future population conditions, and recommends research and monitoring needs. The assessment is independently peer reviewed at the Review Workshop. The product of the Review Workshop is a summary documenting panel opinions regarding the strengths and weaknesses of the stock assessment and input data. Participants for SEDAR Workshops are appointed by the GMFMC, NOAA Fisheries Southeast Regional Office, and the NOAA Southeast Fisheries Science Center. Participants include: data collectors and database managers; stock assessment scientists, biologists, and researchers; constituency representatives including fishermen, environmentalists, and non-governmental organizations (NGOs); international experts; and staff of Councils, Commissions, and state and federal agencies.

Dated: November 19, 2012.

Tracey L. Thompson,

Acting Deputy Director, Office of Sustainable Fisheries, National Marine Fisheries Service.
