also externally satellite tagged. The permit holder now requests authorization to: Telemetry tag adult or juvenile Atlantic sturgeon with either internal or external telemetry tags without respect to salinity level of the Chesapeake Bay and tributaries in the borders of Virginia and Maryland. The numbers of adult and sub-adult Atlantic sturgeon taken would be reduced from 425 to 350 per year, while numbers of juvenile Atlantic sturgeon taken would be reduced from 175 to 125 annually. However, there would be an option added to internally telemetry tag 50 juvenile Atlantic sturgeon; and the numbers of ELS would also be increased from 25 to 50 annually while using a film crew to document the activity. The modification would be valid until the permit expires on April 5, 2017.

Dated: November 30, 2012.
