BILLING CODE 4810-31-P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[EPA-R09-OAR-2012-0120; FRL-9710-2]

Revisions to the California State Implementation Plan, Imperial County, Placer County, and Ventura County Air Pollution Control Districts

AGENCY: Environmental Protection
Agency (EPA).

ACTION: Proposed rule.

SUMMARY: EPA is proposing to approve revisions to the Imperial County Air Pollution Control District (ICAPCD), Placer County Air Pollution Control District (PCAPCD) and Ventura County Air Pollution Control District (VCAPCD) portions of the California State Implementation Plan (SIP). Under authority of the Clean Air Act as amended in 1990 (CAA or the Act), we are proposing to approve local rules that address emission statements for ICAPCD and PCAPCD and definitions for VCAPCD.

DATES: Any comments on this proposal must arrive by January 7, 2013.

ADDRESSES: Submit comments, identified by docket number [EPA-R09-OAR-2012-0120], by one of the following methods:

1. *Federal eRulemaking Portal:* www.regulations.gov. Follow the on-line instructions.

2. *Email:* steckel.andrew@epa.gov.

3. *Mail or deliver:* Andrew Steckel (Air-4), U.S. Environmental Protection Agency Region IX, 75 Hawthorne Street, San Francisco, CA 94105-3901.

Instructions: All comments will be included in the public docket without change and may be made available online at www.regulations.gov, including any personal information provided, unless the comment includes Confidential Business Information (CBI) or other information whose disclosure is

restricted by statute. Information that you consider CBI or otherwise protected should be clearly identified as such and should not be submitted through www.regulations.gov or email. www.regulations.gov is an “anonymous access” system, and EPA will not know your identity or contact information unless you provide it in the body of your comment. If you send email directly to EPA, your email address will be automatically captured and included as part of the public comment. If EPA cannot read your comment due to technical difficulties and cannot contact you for clarification, EPA may not be able to consider your comment. Electronic files should avoid the use of special characters, any form of encryption, and be free of any defects or viruses.

Docket: Generally, documents in the docket for this action are available electronically at www.regulations.gov and in hard copy at EPA Region IX, 75 Hawthorne Street, San Francisco, California. While all documents in the docket are listed at www.regulations.gov, some information may be publicly available only at the hard copy location (e.g., copyrighted material, large maps), and some may not be publicly available in either location (e.g., CBI). To inspect the hard copy materials, please schedule an appointment during normal business hours with the contact listed in the **FOR FURTHER INFORMATION CONTACT** section.

FOR FURTHER INFORMATION CONTACT: Cynthia Allen, EPA Region IX, (415) 947-4120, allen.cynthia@epa.gov.

SUPPLEMENTARY INFORMATION: This proposal addresses the following local rules: ICAPCD Rule 116, PCAPCD Rule 503, and VCAPCD Rule 2. In the Rules and Regulations section of this **Federal Register**, we are approving these local rules in a direct final action without prior proposal because we believe these SIP revisions are not controversial. If we receive adverse comments, however, we will publish a timely withdrawal of the direct final rule and address the comments in subsequent action based on this proposed rule. Please note that if we receive adverse comment on an amendment, paragraph, or section of this rule and if that provision may be severed from the remainder of the rule, we may adopt as final those provisions of the rule that are not the subject of an adverse comment.

We do not plan to open a second comment period, so anyone interested in commenting should do so at this time. If we do not receive adverse comments, no further activity is

planned. For further information, please see the direct final action.

Dated: July 19, 2012.

Jared Blumenfeld,

Regional Administrator, Region IX.

BILLING CODE 6560-50-P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 660

[Docket No. 120924487-2487-01]

RIN 0648-XC263

Fisheries Off West Coast States; Coastal Pelagic Species Fisheries; Annual Specifications

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Proposed rule.

SUMMARY: NMFS proposes to implement the annual catch limit (ACL), harvest guideline (HG), annual catch target (ACT) and associated annual reference points for Pacific mackerel in the U.S. exclusive economic zone (EEZ) off the Pacific coast for the fishing season of July 1, 2012, through June 30, 2013. This rule is proposed according to the Coastal Pelagic Species (CPS) Fishery Management Plan (FMP). The proposed 2012-2013 ACL or maximum HG for Pacific mackerel is 40,514 metric tons (mt). The proposed ACT, which will be the directed fishing harvest target, is 30,386 mt. If the fishery attains the ACT, the directed fishery will close, reserving the difference between the ACL and ACT (10,128 mt) as a set aside for incidental landings in other CPS fisheries and other sources of mortality. This rule is intended to conserve and manage the Pacific mackerel stock off the U.S. West Coast.

DATES: Comments must be received by January 7, 2013.

ADDRESSES: You may submit comments on this document identified by NOAA-NMFS-2012-0215 by any of the following methods:

- *Electronic Submissions:* Submit all electronic public comments via the Federal eRulemaking Portal <http://www.regulations.gov>. To submit comments via the e-Rulemaking Portal, first click the “submit a comment” icon, then enter NOAA-NMFS-2012-0215 in the keyword search. Locate the document you wish to comment on

from the resulting list and click on the "Submit a Comment" icon on the right of that line.

- *Mail:* Submit written comments to Rodney R. McInnis, Regional Administrator, Southwest Region, NMFS, 501 West Ocean Blvd., Suite 4200, Long Beach, CA 90802.

- *Fax:* (562) 980-4047.

Instructions: Comments must be submitted by one of the above methods to ensure that the comments are received, documented, and considered by NMFS. Comments sent by any other method, to any other address or individual, or received after the end of the comment period, may not be considered. All comments received are a part of the public record and will generally be posted for public viewing on www.regulations.gov without change. All personal identifying information (e.g., name, address, etc.) submitted voluntarily by the sender will be publicly accessible. Do not submit confidential business information, or otherwise sensitive or protected information. NMFS will accept anonymous comments (enter "N/A" in the required fields if you wish to remain anonymous). Attachments to electronic comments will be accepted in Microsoft Word or Excel, WordPerfect, or Adobe PDF file formats only.

Copies of the report "Pacific Mackerel (*Scomber japonicus*) Stock Assessment for USA Management in the 2011-12 Fishing Year" and the Environmental Assessment/Regulatory Impact Review for this action may be obtained from the Southwest Regional Office (see **ADDRESSES**).

FOR FURTHER INFORMATION CONTACT: Joshua Lindsay, Southwest Region, NMFS, (562) 980-4034.

SUPPLEMENTARY INFORMATION: During public meetings each year, the estimated biomass for Pacific mackerel is presented to the Pacific Fishery Management Council's (Council) Coastal Pelagic Species (CPS) Management Team (Team), the Council's CPS Advisory Subpanel (Subpanel) and the Council's Scientific and Statistical Committee (SSC), where the biomass and the status of the fisheries are reviewed and discussed. The biomass estimate is then presented to the Council along with the calculated overfishing limit (OFL) and available biological catch (ABC), annual catch limit (ACL) and harvest guideline (HG) and/or annual catch target (ACT) recommendations and comments from the Team, Subpanel and SSC. Following review by the Council and after hearing public comment, the Council adopts a

biomass estimate and makes its catch level recommendations to NMFS.

The purpose of this proposed rule is to implement the 2012-2013 ACL, HG, ACT and other annual catch reference points, including OFL and an ABC that takes into consideration uncertainty surrounding the current estimate of biomass, for Pacific mackerel in the U.S. EEZ off the Pacific coast. (The EEZ off the Pacific Coast encompasses ocean waters seaward of the outer boundary of state waters, which is 3 nautical miles off the coast, out to a line 200 nautical miles from the coast.) The CPS FMP and its implementing regulations require NMFS to set these annual catch levels for the Pacific mackerel fishery based on the annual specification framework in the FMP. This framework includes a harvest control rule that determines the maximum HG, the primary management target for the fishery, for the current fishing season. The HG is based, in large part, on the current estimate of stock biomass. The harvest control rule in the CPS FMP is $HG = [(Biomass - Cutoff) * Fraction * Distribution]$ with the parameters described as follows:

1. *Biomass.* The estimated stock biomass of Pacific mackerel for the 2012-2013 management season is 211,126 mt.
2. *Cutoff.* This is the biomass level below which no commercial fishery is allowed. The FMP established this level at 18,200 mt.
3. *Fraction.* The harvest fraction is the percentage of the biomass above 18,200 mt that may be harvested.
4. *Distribution.* The average portion (currently 70%) of the total Pacific mackerel biomass that is estimated to be in the U.S. EEZ off the Pacific coast, based on the average historical larval distribution obtained from scientific cruises and the distribution of the resource according to the logbooks of aerial fish-spotters.

At the June 2012 Council meeting, the Council recommended management measures for the Pacific mackerel fishery. These management measures were based on the 2011 full stock assessment, which estimated the biomass of Pacific mackerel to be 211,126 mt. The 2011 full stock assessment of Pacific mackerel was reviewed by a Stock Assessment Review Panel in May 2011, and was approved in June 2011 by the SSC as the best available science for use in management. Based on recommendations from the Council's SSC and other advisory bodies, the Council recommended and NOAA Fisheries (NMFS) is proposing, an OFL of 44,336 mt, an ABC of 42,375 mt, an ACL and maximum harvest guideline

(HG) of 40,514 mt, and an ACT of 30,386 mt for the 2012-2013 Pacific mackerel fishing year. These catch specifications are based on the biomass estimate for Pacific mackerel and the control rules established in the CPS FMP.

If the ACT is attained, the directed fishery will close, and the difference between the ACL and ACT (10,128 mt) will be reserved as a set aside for incidental landings in other CPS fisheries and other sources of mortality. In that event, incidental harvest measures will be in place for the remainder of the fishing year, including a 45 percent incidental catch allowance when Pacific mackerel are landed with other CPS. In other words, no more than 45 percent by weight of the CPS landed per trip may be Pacific mackerel, except that up to 1 mt of Pacific mackerel could be landed without landing any other CPS. Upon the fishery attaining the ACL/HG (40,514 mt), no vessels in CPS fisheries may retain Pacific mackerel. The purpose of the incidental set-aside and allowance of an incidental fishery is to allow for the restricted incidental landings of Pacific mackerel in other fisheries, particularly other CPS fisheries, when the directed fishery is closed to reduce potential discard of Pacific mackerel and allow for continued prosecution of other important CPS fisheries.

The NMFS Southwest Regional Administrator will publish a notice in the **Federal Register** announcing the date of any closure to either directed or incidental fishing. Additionally, to ensure the regulated community is informed of any closure NMFS will also make announcements through other means available, including fax, email, and mail to fishermen, processors, and state fishery management agencies.

Detailed information on the fishery and the stock assessment are found in the report "Pacific Mackerel (*Scomber japonicus*) Stock Assessment for USA Management in the 2011-12 Fishing Year" (see **ADDRESSES**).

Classification

Pursuant to section 304(b)(1)(A) of the Magnuson-Stevens Fishery Conservation and Management Act, the NMFS Assistant Administrator has determined that this proposed rule is consistent with the CPS FMP, other provisions of the Magnuson-Stevens Fishery Conservation and Management Act, and other applicable law, subject to further consideration after public comment.

These proposed specifications are exempt from review under Executive Order 12866.

Pursuant to the Regulatory Flexibility Act (RFA), 5 U.S.C. 605(b), the Chief Counsel for Regulation of the Department of Commerce certified to the Chief Counsel for Advocacy of the Small Business Administration that this proposed rule, if adopted, would not have a significant economic impact on a substantial number of small entities, for the reasons as follows:

The purpose of this proposed rule is to implement the 2012–2013 annual specifications for Pacific mackerel in the U.S. EEZ off the Pacific coast. The CPS FMP and its implementing regulations require NMFS to set an OFL, ABC, ACL and HG or ACT for the Pacific mackerel fishery based on the harvest control rules in the FMP. The specific harvest control rule is applied to the current stock biomass estimate to derive the annual HG, which is used to manage the commercial take of Pacific mackerel.

The U.S. Small Business Administration defines small businesses engaged in fishing as those vessels with annual revenues of or below \$4 million. The small entities that would be affected by the proposed action are the vessels that compose the West Coast CPS finfish fleet. Pacific mackerel harvest is one component of CPS fisheries off the U.S. West Coast, which primarily includes the fisheries for Pacific sardine, northern anchovy and market squid. Pacific mackerel are principally caught off southern California within the limited entry portion (south of 39 degrees N. latitude; Point Arena, California) of the fishery. Fifty-eight vessels are currently permitted in the Federal CPS limited entry fishery off California. The average annual per vessel revenue in 2011 for

the West Coast CPS finfish fleet was well below \$4 million; therefore, all of these vessels therefore are considered small businesses under the RFA. Because each affected vessel is a small business, this proposed rule has an equal effect on all of these small entities, and therefore will impact a substantial number of these small entities in the same manner.

The profitability of these vessels as a result of this proposed rule is based on the average Pacific mackerel ex-vessel price per mt. NMFS used average Pacific mackerel ex-vessel price per mt to conduct a profitability analysis because cost data for the harvesting operations of CPS finfish vessels was limited or unavailable. For the 2011–2012 fishing year the HG was 40,514 mt and was divided into a directed fishery (or ACT) of 30,386 mt and an incidental fishery of 10,128 mt. Approximately 1,900 mt of this HG was harvested in 2011–2012 fishing season with an estimated ex-vessel value of \$456,000 mt. Using these figures, the average 2011/2012 ex-vessel price per mt of Pacific mackerel was approximately \$240.

The proposed ACL/HG for the 2012/2013 Pacific mackerel fishing season is 40,514 mt, with a directed fishing harvest target or ACT of 30,386 mt. This season's directed fishing target is the same as the previous year. If the fleet were to take the entire 2012–2013 ACT, and assuming a coastwide average ex-vessel price per mt of \$220 (average of 2010 and 2011 ex-vessel), the potential revenue to the fleet would be approximately \$6.6 million. However, this result will depend greatly on market forces within the fishery, and on the regional availability of the resource

to the fleet and the fleets' ability to find schools of Pacific mackerel. The annual average U.S. Pacific mackerel harvest from 2001 to 2010 is approximately 4,500 mt, and over the last 10 years landings have averaged approximately 6,000 mt without exceeding 10,000 mt. As a result, it is unlikely that the ACT proposed in this rule will limit the potential profitability of the fleet from Pacific mackerel. Accordingly, vessels' profits are not expected to be altered as a result of this rule as it relates to recent catches in the fishery and the previous season's regulation.

Based on the disproportionality and profitability analysis above, this rule, if adopted, will not have a significant economic impact on a substantial number of these small entities. As a result, an Initial Regulatory Flexibility Analysis is not required, and none has been prepared.

There are no reporting, record-keeping, or other compliance requirements required by this proposed rule. Additionally, no other Federal rules duplicate, overlap or conflict with this proposed rule.

This action does not contain a collection-of-information requirement for purposes of the Paper Reduction Act.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: December 3, 2012.

Alan D. Risenhoover,

Director, Office of Sustainable Fisheries, performing the functions and duties of the Deputy Assistant Administrator for Regulatory Programs, National Marine Fisheries Service.
