Comments, protests, and interventions may be filed electronically via the Internet in lieu of paper. See 18 CFR 385.2001(a)(1)(iii) and the instructions on the Commission's Web site (<http://www.ferc.gov/docs-filing/efiling.asp>). Commenters can submit brief comments up to 6,000 characters, without prior registration, using the eComment system (<http://www.ferc.gov/docs-filing/ecomment.asp>) and must include name and contact information at the end of comments. The Commission strongly encourages electronic filings.

All documents (original and seven copies) filed by paper should be sent to: Secretary, Federal Energy Regulatory Commission, 888 First Street NE., Washington, DC 20426. Please include the project number (P-11797-043) on any comments or motions filed.

The Commission's Rules of Practice and Procedure require all interveners filing documents with the Commission to serve a copy of that document on

each person whose name appears on the official service list for the project. Further, if an intervener files comments or documents with the Commission relating to the merits of an issue that may affect the responsibilities of a particular resource agency, they must also serve a copy of the document on that resource agency. A copy of any motion to intervene must also be served upon each representative of the Applicant specified in the particular application.

k. *Description of Application*: The licensee proposes to amend the water surface elevation requirement of the impoundment set forth in article 402 of the license for the Three Rivers Project. Specifically, the licensee proposes to operate with the impoundment elevation at 798 feet National Geodetic Vertical Datum 1929 (NGVD29) and any elevation fluctuation shall not exceed 0.25 foot. The current impoundment elevation requirement under article 402 of the license is 797 feet NGVD29 \pm 0.25 foot. However, the licensee states in its amendment application that at the time of the license application and request for water quality certification, the licensee referred to the incorrect datum at some point. Therefore, the reservoir level license requirement referenced 797 feet NGVD29 instead of the historic operating level of 798 feet NGVD29, the elevation prior to license issuance. The licensee is attempting to correct the datum error with an amendment to its license, but since the project has historically operated at an impoundment water surface elevation of 798 feet NGVD29, no actual change in project operation is proposed.

l. *Locations of the Application*: A copy of the application is available for inspection and reproduction at the Commission's Public Reference Room, located at 888 First Street NE., Room 2A, Washington, DC 20426, or by calling (202) 502-8371. Any comments, protests, or motions to intervene must be received on or before the specified comment date for the particular application.

o. Any filings must bear in all capital letters the title "COMMENTS", "PROTEST", or "MOTION TO INTERVENE", as applicable, and the Project Number of the particular application to which the filing refers.
