OMB Control Nos.: FERC-500 (1902-0058); FERC-505 (1902-0114).

Type of Request: 16 U.S.C. 797(e) authorizes the Commission to issue licenses to citizens of the United States for the purpose of constructing, operating, and maintaining dams, across, along, from, or within waterways over which Congress has jurisdiction. The Electric Consumers Protection Act amended the Federal Power Act to provide the Commission with the responsibility of issuing licenses for non-federal hydroelectric plants. 16 U.S.C. 797(e) also requires the Commission to give equal consideration to preserving energy conservation, the protection, mitigation of damage to, and enhancement of, fish and wildlife, the protection of recreational opportunities, and the preservation of other aspects of environmental quality when approving licenses. Finally, 16 U.S.C. 799 stipulates conditions upon which the Commission issues hydroelectric licenses.

The Commission requires all hydroelectric license applications to address a variety of environmental concerns. Many of these concerns address environmental requirements developed by other agencies. The applicants must provide facts in order for the Commission to understand and resolve potential environmental problems associated with the application in the interests of the United States public.

Types of Respondents: Non-federal hydroelectric plants greater than 5 megawatt capacity (FERC-500); non-federal hydroelectric plants less than 5 megawatts capacity (FERC-505).
