

12,374.82 annual reporting and 689 recordkeeping burden hours. This burden has not changed.

Summary of Estimated Burden

The net aggregate change from the existing to the revised annual burden for this entire Information Collection is a decrease of 1,803.55 hours from the previous submission. For the activity relating to the 60-day notice, we are decreasing the estimated annual burden for State agencies and debtors from 36,313.83 hours to 34,510.28 hours to reflect a decrease in the number of notices and the resulting inquiries and appeals. The State-level submissions portion of the reporting and recordkeeping burden is estimated to require the same number of hours as the currently approved collection, 26.5 hours. The annual ADP portion of this burden package is also estimated to require the same number of hours as the currently approved collection, 12,375 reporting and 689 recordkeeping hours. This results in a final total of 47,600.6 annual burden hours.

[Docket No. FSIS-2012-0051]

National Advisory Committee on Meat and Poultry Inspection

AGENCY: Food Safety and Inspection Service, USDA.

ACTION: Notice of public meeting.

SUMMARY: Pursuant to the Federal Advisory Committee Act, the Food Safety and Inspection Service (FSIS) is announcing a meeting of the National Advisory Committee on Meat and Poultry Inspection (NACMPI). The Committee is being convened to review two topics for FSIS. The first is strengthening Agency verification activities and guidance concerning

sanitary dressing and antimicrobial interventions at veal slaughter operations. FSIS test results show that the percent positive for Shiga toxin-producing *Escherichia coli* (STEC) from trimmings and ground beef produced from veal are higher than trimmings and ground beef produced from other cattle slaughter classes. FSIS is seeking feedback from NACMPI on improvements FSIS can make to its verification activities related to sanitary dressing and interventions at veal slaughter establishments and improvements it can make to its compliance guidance to address veal slaughter operations.

FSIS is also seeking feedback from NACMPI on the ideal outreach strategy for communicating with the veal industry.

The second topic is a review of criteria for categorizing FSIS regulations as public health regulations. FSIS has revised its criteria for identifying regulations that are most closely related to public health outcomes. FSIS is seeking input from NACMPI on the criteria and feedback on the proposed approach.

DATES: The meeting is scheduled for January 16–17, 2013 from 9:00 a.m. to 5:00 p.m. Eastern Time. The committee will meet from 8:00 a.m. to 9:00 a.m. on January 16 for administrative purposes; this portion of the meeting is not open to the public.

ADDRESSES: The meetings will be held in the Auditorium at the Patriot Plaza III building, 355 E. Street SW., Washington, DC 20024. The auditorium is located on the first floor. Please note that due to increased security measures at the Patriot Plaza III, all persons wishing to attend are strongly encouraged to RSVP in advance.

Forest Service

Dakota Prairie Grasslands, North Dakota; Oil and Gas Development Supplemental Environmental Impact Statement

AGENCY: Forest Service, USDA.

ACTION: Notice of intent to prepare a supplemental environmental impact statement.

SUMMARY: In June of 2003, the Dakota Prairie Grasslands Record of Decision for Oil and Gas Leasing on the Little Missouri and Cedar River National Grasslands was signed. This decision spelled out leasing stipulations, consistent with the Revised Dakota Prairie Grasslands Land and Resource Management Plan, based on the 2001 Northern Great Plains Management Plans Revision FEIS which included a Reasonably Foreseeable Development Scenario (RFDS) for Oil and Gas for the Little Missouri and Cedar River National Grasslands.

In the 11 years since the analysis was completed there has been a change in the manner in which oil and gas development has occurred on the Dakota Prairie Grasslands, primarily that multiple (4-6) wells can be drilled from a single well pad rather than just one; as was most common in the past. The improvements in horizontal drilling and hydraulic fracturing technologies to improve the ability to access oil and gas located deep underground are the primary reasons for these changes in development.

At this time it is necessary to review the analysis to determine whether or not the effects of the changed pattern of oil and gas development are different from those effects considered in the 2001 FEIS, and whether or not there is a need to change Land and Resource Management Plan standards and guidelines (and possibly leasing stipulations) in order to continue oil

and gas development on the Little Missouri and Cedar River National Grassland units of the Dakota Prairie Grasslands.

DATES: Scoping is not required for supplements to environmental impact statements (40 CFR 1502.9(c)(4)). Review and comments will be solicited once the Draft SEIS is filed with EPA. The draft supplemental environmental impact statement is expected in February, 2013 and the final supplemental environmental impact statement is expected in May, 2013.

SUPPLEMENTARY INFORMATION:

Purpose and Need for Action

In light of a changed pattern of oil and gas activity from what was anticipated in the 2001 RFDS, there is a need for the DPG to supplement our analysis to determine if any changes need to be made to the stipulations in the 2003 Oil and Gas Leasing ROD that authorizes oil and gas leasing on the DPG. The purpose of the analysis is to determine whether or not the effects anticipated in the 2001 FEIS are still accurate and, if they are not, whether or not any additional management direction and/or leasing stipulations are necessary to protect National Forest System lands while still allowing for oil and gas development on the DPG on those lands previously determined to be administratively available for leasing.

Proposed Action

The Dakota Prairie Grasslands has conducted preliminary analysis of the changed condition and, at this time, proposes no change to management direction in the LRMP or to leasing stipulations from the 2003 ROD. However, consistent with 40 CFR 1502.9(2), we will supplement the FEIS to consider the changed pattern of oil and gas development relative to the updated RFDS. The updated RFDS is available by request at the address below or online at: <http://www.fs.fed.us/nepa/fs-usda-pop.php/?project=40652>.
