SUPPLEMENTARY INFORMATION:

A. Purpose

Firms performing under Federal cost-reimbursement contracts are required to

notify the contracting officer in writing whenever they have reason to believe—

(1) The costs the contractors expect to incur under the contracts in the next 60 days, when added to all costs previously incurred, will exceed 75 percent of the estimated cost of the contracts; or

(2) The total cost for the performance of the contracts will be greater or substantially less than estimated. As a part of the notification, the contractors must provide a revised estimate of total cost.

B. Annual Reporting Burden

Based on Federal Procurement Data System data for Fiscal Year 2011, the number of responses for the type of actions related to this information collection requirement increased from 53,456 to 57,460. As a result, there is an upward adjustment to the estimated burden hours since the last notice for an extension to this information collection published in the **Federal Register** at 74 FR 56639, November 2, 2009.

Respondents: 3,598.

Responses per Respondent: 15.96999.

Annual Responses: 57,460.

Hours per Response: .5.

Total Burden Hours: 28,730.

Obtaining Copies of Proposals:

Requesters may obtain a copy of the information collection documents from the General Services Administration, Regulatory Secretariat (MVCB), 1275 First Street NE., Washington, DC 20417, telephone (202) 501–4755. SUPPLEMENTARY INFORMATION:

A. Purpose

Federal Acquisition Regulation (FAR) 52.203-7, Anti-Kickback Procedures, requires that all contractors have in place and follow reasonable procedures designed to prevent and detect in its own operations and direct business relationships, violations of section 3 of the Anti-Kickback Act of 1986 (41 U.S.C. 51-58). Whenever prime contractors or subcontractors have reasonable grounds to believe that a violation of section 3 of the Act may have occurred, they are required to report the possible violation in writing to the contracting agency inspector general, the head of the contracting agency if an agency does not have an inspector general, or the Department of Justice. The information is used to determine if any violations of section 3 of the Act have occurred.

There is no Governmentwide data collection process or system which identifies the number of alleged violations to the Anti-Kickback Act of 1986 (41 U.S.C. 51-58) that are reported annually to agency inspectors general, the heads of the contracting agency if an agency does not have an inspector general, or the Department of Justice. To date, no public comments or questions have been received regarding the burden estimates included in the currently approved clearance.

Proposed Data Collections Submitted for Public Comment and Recommendations

In compliance with the requirement of Section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995 for opportunity for public comment on proposed data collection projects, the Centers for Disease Control and Prevention (CDC) will publish periodic summaries of proposed projects. To request more information on the proposed projects or to obtain a copy of the data collection plans and instruments, call 404-639-7570 and send comments to Ron Otten, 1600 Clifton Road, MS-D74, Atlanta, GA 30333 or send an email to omb@cdc.gov.

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology. Written comments should be received within 60 days of this notice.

Proposed Project

National Intimate Partner and Sexual Violence Surveillance System (0920-0822, Expiration 11/30/2013)—Revision—National Center for Injury Prevention and Control (NCIPC), Centers for Disease Control and Prevention (CDC).

Background and Brief Description

The health burden of Intimate Partner Violence (IPV), Sexual Violence (SV) and stalking are substantial. In 2010, the National Intimate Partner and Sexual Violence Surveillance System (NISVSS) reported that approximately 6.9 million women and 5.6 million men experienced rape, physical violence and/or stalking by an intimate partner within the last year. The health care costs of IPV exceed \$5.8 billion each year, nearly \$3.9 billion of which is for direct medical and mental health care services.

Sexual violence also has a profound and long-term impact on the physical and mental health of the victim. Existing estimates of lifetime experiences of rape range from 15% to 36% for females. Sexual violence against men, although less prevalent, is also a public health problem; approximately, 1 in 5 women and 1 in 71 men have experienced attempted, completed or alcohol or drug facilitated rape at some point in their lifetime. Nearly 1.3 million women reported being raped in the past 12 months. Nearly 1 in 3 women and 1 in 10 men in the United States have experienced rape, physical violence and/or stalking by an intimate partner and reported at least one impact related to experiencing these or other forms of violent behavior within the relationship (e.g., being fearful, concerned for safety, post-traumatic stress disorder (PTSD) symptoms, need for health care, injury, contacting a crisis hotline, need for housing services, need for victim's advocate services, need for legal services, missed at least one day of work or school).

NISVSS 2010 data indicates that approximately 5 million women and 1.4 million men in the United States are stalked in the 12 months prior to the survey. There are overlaps between stalking and other forms of violence in intimate relationships; approximately 14% of females who were stalked by an intimate partner in their lifetime also experienced physical violence by an intimate partner; while 12% of female victims experienced rape, physical violence and stalking by a current or former intimate partner in their lifetime. Furthermore, 76% of female victims of intimate partner homicides were stalked by their partners before they were killed.

In order to address this important public health problem, CDC implemented, beginning in 2010, the National Intimate Partner and Sexual Violence Surveillance System that produces national and state level estimates of IPV, SV and Stalking on an annual basis. In 2010, a total of 16,507 completed interviews were conducted among English and/or Spanish speaking male and female adults (18 years and older) living in the United States.

CDC proposes a revision to the currently approved data collection instrument, by conducting a one-year pilot study using a newly revised instrument during the calendar year of 2013. The changes to the instrument are twofold: First, the current NISVSS survey instrument has been shortened in efforts to develop a core instrument that will be administered on an annual
