

Appendix F requires a broker-dealer choosing to register, upon Commission approval, as an OTC derivatives dealer to develop and maintain an internal risk management system based on Value-at-Risk (“VaR”) models. It is anticipated that a total of four (4) broker-dealers registering as OTC derivatives dealers will spend 1,000 hours on a one-time basis complying with the system development requirements of Rule 15c3-1f, for an estimated one-time initial startup burden of approximately 4,000 hours. Appendix F also requires the OTC derivatives dealer to maintain its system model according to certain prescribed standards. It is anticipated that a total of eight (8) broker-dealers will spend 1,000 hours per year maintaining the system model required by Rule 15c3-1f, for an estimated recurring annual burden of approximately 8,000 hours. Thus, the total industry-wide burden is estimated to be approximately 12,000 hours (4,000 hours + 8,000 hours) for the first year and 8,000 hours for each subsequent year.¹

¹ The Commission estimates that a total of eight entities will be registered as OTC derivatives dealers at the end of the next three years, consisting of the four current OTC derivatives dealers and four anticipated registrants. This is in contrast with the prior estimate of five OTC derivatives dealers, consisting of four current OTC derivatives dealers and one anticipated registrant.
