

unreliable and increases the risk that MBSD is not collecting sufficient margin given market conditions. Moving to the FICC Model that can be updated as the economic environment changes promotes robust risk management and reduces systemic risk because these changes can be more accurately reflected in margin calculations.

The Commission is conditioning its notice of no objection on FICC implementing policies and procedures reasonably designed to ensure that FICC timely analyzes and monitors the performance and appropriateness of the FICC Model. As discussed above, the OTS model directly incorporates the concept of seasonality, while the FICC model does not. In addition, the FICC model relies on market-observed data to capture the prepayment risk of the mortgage pools underlying the TBAs. The Commission understands that the OTS and many industry models use historical data on actual prepayments to determine the level of prepayment risk. The Commission believes it is important for both FICC and the Commission to observe how the FICC model compares to actual seasonality and prepayment history, two parameters that had previously informed the OTS model. As a result, the Commission would expect such policies and procedures to assess the performance of the FICC Model as compared to other published or calculated prepayment rate forecasts and to analyze the VaR coverage resulting from the use of the FICC Model as compared to the coverage that would be obtained after applying alternate VaR methodologies, such as the index-based haircut methodology already utilized by FICC. The Commission expects that this analysis would be disseminated to the Commission on a monthly basis.

The Commission believes that the replacement of the OTS Model with the FICC Model, subject to the conditions described above, meets the objectives and principles for the risk management standards prescribed under Section 805(a). The ability for FICC to update the FICC Model in response to changing economic conditions allows FICC to more appropriately calculate and collect margin, which better enables FICC to respond in the event that a member defaults. This in turn promotes robust risk management and safety and soundness, reduces systemic risk and supports the stability of the broader financial system.

#### Conclusion

It is therefore noticed, pursuant to Section 806(e)(1)(I) of the Clearing

Supervision Act,<sup>17</sup> that, the Commission *does not object* to the Prepayment Model Change (File No. AN-FICC-2012-09) and that FICC be and hereby is *authorized* to implement the Prepayment Model Change (File No. AN-FICC-2012-09) subject to FICC implementing policies and procedures reasonably designed to ensure that FICC timely analyzes and monitors the performance and appropriateness of the FICC Model.

By the Commission.

[Release No. 34-68490; File No. SR-CME-2012-46]

### Self-Regulatory Organizations; Chicago Mercantile Exchange Inc.; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Amend the Fee Schedule Applicable to its OTC Credit Default Swap Clearing Offering

December 20, 2012.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (“Act”) <sup>1</sup> and Rule 19b-4 thereunder,<sup>2</sup> notice is hereby given that on December 18, 2012, the Chicago Mercantile Exchange Inc. (“CME” or “Exchange”) filed with the Securities and Exchange Commission (“Commission”) the proposed rule change as described in Items I, II and III below, which Items have been prepared primarily by CME. CME filed the proposed rule change pursuant to Section 19(b)(3)(A)(ii) <sup>3</sup> of the Act and Rule 19b-4(f)(2) <sup>4</sup> thereunder so that the proposal was effective upon filing with the Commission. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

#### I. Clearing Agency’s Statement of the Terms of Substance of the Proposed Rule Change

CME is proposing to amend the fee schedule that currently applies to its OTC Credit Default Swap clearing offering. The text of the proposed rule change is available at the Exchange’s Web site at <http://www.cmegroup.com>,

at the principal office of the Exchange, and at the Commission’s Public Reference Room.

#### II. Clearing Agency’s Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the clearing agency included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The clearing agency has prepared summaries, set forth in sections (A), (B) and (C) below, of the most significant aspects of such statements.

##### (A) Clearing Agency’s Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

This filing proposes to make minor amendments to the current fee schedule that applies to CDX North American Index Credit Default Swaps cleared at CME. The only modification that is proposed is to extend the current twenty five percent (25%) discount of base clearing fees for all market participants that clear OTC North American Index CDS products at CME for another year. This discount was scheduled to expire as of December 31, 2012.

The proposed changes are related to fees and therefore will become effective immediately. However, the proposed fee changes will become operative as of January 2, 2013. CME has also certified the proposed rule changes that are the subject of this filing to the Commodity Futures Trading Commission (“CFTC”), in CFTC Submission 12-464.

The proposed CME rule amendments establish or change a member due, fee, or other charge imposed by CME under Section 19(b)(3)(A)(ii) of the Securities Exchange Act of 1934 and Rule 19b-4(f)(2) thereunder. CME believes that the proposed rule change is consistent with the requirements of the Securities Exchange Act of 1934 and the rules and regulations thereunder and, in particular, to 17A(b)(3)(D), in that it provides for the equitable allocation of reasonable dues, fees, and other charges among participants. The proposed changes apply to all market participants clearing trades at CME. CME believes the modifications should encourage firms to submit additional volume into the system which should help ensure readiness and also help build open interest ahead of a regulatory mandate. CME notes that it operates in a highly competitive market in which market participants can readily direct business to competing venues.
