

roadway workers operating within the limits of their authority, and to protect against the movement of trains through switches not properly lined for the intended movement.

ETMS Version 7.0 is the technical successor to earlier versions of ETMS, approved by FRA under the provisions of 49 CFR Part 236, Subpart H—Standards for Processor-Based Signal and Train Control Systems (Docket Number FRA–2006–23687). BNSF asserts that the PTCSP contains the information required by 49 CFR 236.1015(d) and that the PTCSP:

1. Demonstrates that ETMS Version 7.0 reliably executes the functions set forth in 49 CFR 236.1005.

2. Demonstrates that the use of ETMS Version 7.0 obtains at least an 80-percent reduction of the risk associated with accidents preventable by the functions set forth in 49 CFR 236.1005, when all effects of the change associated with the PTC system are taken into account.

BNSF believes that approval and certification of ETMS Version 7.0 will enhance railroad safety by allowing the deployment and use in revenue service of ETMS to prevent or mitigate the consequences of a loss of situational awareness by train crews, or other conditions, that could otherwise result in catastrophic consequences to the train crew and the general public.

DEPARTMENT OF THE TREASURY

Office of the Comptroller of the Currency

Agency Information Collection Activities; Renewal of a Currently Approved Collection; and Comment Request for Reports of Suspicious Activity

AGENCY: Office of the Comptroller of the Currency (OCC).

ACTION: Notice and request for comments.

SUMMARY: The OCC, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on information collections, as required by the Paperwork Reduction Act of 1995, Public Law 104-13 (44 U.S.C. 3506(c)(2)(A)). The OCC is soliciting comments concerning the currently approved Minimum Security Devices and Procedures, Reports of Suspicious Activities, and Bank Secrecy Act Compliance Program information collection. The Minimum Security Devices and Procedures and Bank Secrecy Act Compliance Program portion of the information collection is being extended without change. The OCC is proposing to extend, with revision, the interagency suspicious activity report (SAR-DI) portion of the collection and is inviting comments on this revision.

As the Bank Secrecy Act (BSA) administrator, the Financial Crimes Enforcement Network (FinCEN) in the U.S. Department of Treasury is changing from a system originally designed for collecting industry-specific paper forms to a modernized information technology environment centered on electronic reporting. Based on financial institution type, depository institutions, broker-dealers in securities, futures commission merchants and introducing brokers in commodities, insurance companies, mutual funds, money services businesses, and casinos file reports on four separate forms. FinCEN's new approach is to have one electronically filed interactive BSA SAR that will be used by all filing institutions to report suspicious activity as of April 1, 2013.

There are no proposed changes to the suspicious activity report regulation. National banks and federal savings associations supervised by the OCC will continue to follow the regulation, interagency guidance, and filing instructions to determine when a report should be filed and what information should be included in the report.

The interactive BSA SAR has several new data fields and introduces data fields from the SARs of other industries. On March 29, 2012, FinCEN released guidance titled, "Filing FinCEN's New Currency Transaction Report and Suspicious Activity Report" (FIN-2012-G002). The guidance notes that FinCEN is making available additional and more specific data elements (that is, characterizations of suspicious activity and types of financial services) as a more efficient way to bring information about suspicious activity to the attention of FinCEN and law enforcement. The guidance clarified the addition of new and expanded data elements does not create an expectation that financial institutions will revise internal programs, or develop new programs, to capture information that reflects the expanded data elements. Data elements designated as "critical fields (questions for which an answer must be provided) in the BSA SAR are identified by the asterisk preceding the data element number.

DATES: Written comments should be received on or before April 8, 2013.

ADDRESSES: Interested parties are invited to submit written comments to the OCC. All comments should refer to the Office of Management and Budget (OMB) control numbers. Direct all written comments as follows:

Communications Division, Office of the Comptroller of the Currency, Public Information Room, Mailstop 6W-11, Attention: 1557-0180, Washington, DC 20219. In addition, comments may be sent by electronic mail to regs.comments@occ.treas.gov. You may personally inspect and photocopy comments at the OCC's Public Information Room, 400 7th Street SW., Washington, DC. Upon arrival, visitors will be required to present valid government-issued photo identification and submit to security screening in order to inspect and photocopy comments.

Additionally, you should send a copy of your comments to OCC Desk Officer, 1557-0180, by mail to U.S. Office of Management and Budget, 725 17th Street NW., #10235, Washington, DC

SUPPLEMENTARY INFORMATION:

The OCC is soliciting comments concerning the currently approved collections covered under the information collection titled "Minimum Security Devices and Procedures, Reports of Suspicious Activities, and Bank Secrecy Act Compliance." The Minimum Security Devices and Procedures and Bank Secrecy Act Compliance Program information collection is being extended without change. The OCC is proposing to extend, with revision, the suspicious activity report (SAR-DI) portion of the collection and is inviting comments on the interactive BSA SAR that will be used to report suspicious activity as of April 1, 2013.
