SUPPLEMENTARY INFORMATION: The BIA is proposing to develop a ten-year integrated weed management plan for the Navajo Indian Reservation. The Navajo Indian Reservation lands are infested with noxious and/or invasive weeds that have social and economic impacts on the Navajo Nation. The BIA, in partnership with cooperating agencies, intends to develop an integrated weed management plan to prevent, control, reduce, and eliminate the detrimental impacts of weed infestations throughout the reservation. The proposed action would authorize new treatments of noxious and invasive weed infestations throughout the Navajo Indian Reservation. The number of infestations and amount of acreage treated will be determined by the annual funding allocations for project implementation. The various methods of noxious/invasive weed control that will be considered during development of alternatives for the integrated weed management plan include, but will not be limited to, mechanical, cultural, biological and herbicidal treatments, and other methods that may be identified during the public scoping process.

The purpose of the public scoping process is to determine relevant issues that will influence the scope of the environmental analysis, including alternatives, and guide the process for developing the EIS. At present, the BIA has identified the following preliminary issues: Surface and ground water quality; environmental justice considerations; cultural and historic

resources; biological resources; public health; and socioeconomics.

The BIA will use and coordinate the NEPA commenting process to satisfy the public involvement process for Section 106 of the National Historic Preservation Act (16 U.S.C. 470f) as provided for in 36 CFR 800.2(d)(3). Native American tribal consultations will be conducted in accordance with the Department of the Interior's consultation policy, and tribal concerns will be given due consideration, including impacts on Indian trust assets. Federal, State, and local agencies, along with other stakeholders that may be interested in or affected by the BIA's decision on this project are invited to participate in the scoping process and, if eligible, may request or be requested by the BIA to participate as a cooperating agency.

I. Abstract

The Organic Act of 1916 (NPS Organic Act) (16 U.S.C. 1 *et seq.*) authorizes the Secretary of the Interior to develop regulations for national park

units under the Department's jurisdiction. The Mining in the Parks Act (16 U.S.C. 1901 *et seq.*) directs the Secretary of the Interior to regulate all operations in park units in connection with the exercise of mineral rights on patented and unpatented mining claims.

The regulations at 36 CFR part 9, Subparts A and B, ensure that mining and non-Federal oil and gas activities on units of the National Park System are conducted in a manner consistent with preserving each unit for the benefit of present and future generations. The information required by Subpart A identifies the claim, claimant, and operator (the claimant and operator are often the same) and details how the

operator intends to access and develop the minerals associated with the claim. It also identifies the steps the operator intends to take to minimize any adverse impacts of the mining operations on park resource and values. No information, except claim ownership information, is submitted unless the claimant wishes to conduct mining operations. The information required by Subpart B identifies the owner and operator (the owner and operator are often the same) and details how the operator intends to access and develop the oil and gas rights. It also identifies the steps the operator intends to take to minimize any adverse impacts on park

resources and values. No information is submitted unless the owner wishes to conduct oil and gas operations.
