

*Nature and Extent of Confidentiality:* The Commission is not requesting respondents to submit or disclose confidential information. However, in certain circumstances, respondents may voluntarily choose to submit confidential information pursuant to applicable Commission confidentiality rules.

*Needs and Uses:* The Commission will submit this expiring information collection after this comment period to obtain the full, three year clearance from the Office of Management and Budget (OMB). The Commission is requesting approval for an extension (no change in the reporting, recordkeeping and/or third party disclosure requirements). There are no changes to the Commission's previous burden estimates. Section 251 is designed to accelerate private sector and deployment of telecommunications technologies and services by spurring competition. In order to foster competition in the local telephone market, the Telecommunications Act of 1996 requires incumbent local exchange carriers (incumbent LECs) to share certain elements of their local telephone networks, providing them to other carriers at reasonable prices on an unbundled basis. These "unbundled network elements (UNEs)" are necessary for competition because the only alternative, building entire new telephone networks, would be prohibitively expensive for new entrants. In Order FCC 03-36, the Commission adopted rules and regulation designed to eliminate operation barriers to competition in the telecommunications services market and implement certain provisions of section 251, including the UNE obligations of incumbent LECs. In the Order on Remand, FCC 04-290, the Commission responded to a decision by the United States Court of Appeals for the District of Columbia that vacated the "sub-delegation" of authority to state commissions and vacated and remanded certain nationwide impairment findings, including mass market switching and dedicated transport.

The Commission is requesting approval for an extension (no change in the reporting, recordkeeping and/or third party disclosure requirements).

Under section 10 of the Communications Act of 1934, as amended, telecommunications carriers may petition the Commission to forbear from applying to a telecommunications carrier any statutory provision or Commission regulation. When a carrier petitions the Commission for forbearance, section 10 requires the Commission to make three determinations with regard to the need for the challenged provision or regulation. If the Commission fails to act within one year (extended by three additional months, if necessary) the petition is "deemed granted" by operation of law. These determinations require complex, fact-intensive analysis, e.g., "whether forbearance from enforcing the provision or regulation will promote competitive market conditions." Under the new filing procedures, the Commission requires that petitions for forbearance must be "complete as filed" and explain in detail what must be included in the forbearance petition. The Commission also incorporates by reference its rule, 47 CFR 1.49, which states the Commission's standard "specifications as to pleadings and documents." Precise filing requirements are necessary because of section 10's strict time limit for Commission action. Also, commenters must be able to understand clearly the scope of the petition in order to comment on it. Finally, standard filing procedures inform petitioners

precisely what the Commission expects from them in order to make the statutory determinations that the statute requires.

On May 14, 2012, the Commission released the Third Order on Reconsideration of the USF/ICC Report and Order, FCC 12-52, which revised section 54.1009(a) of the Commission's rules. In adopting the rules, the Commission comprehensively reformed and modernized the universal service and intercarrier compensation systems to ensure that all Americans have access to robust, affordable broadband and advanced mobile services. Concluding that mobile voice and broadband services provide unique consumer benefits, and that promoting the universal availability of such services is a vital component of the Commission's universal service mission, the Commission created the Mobility Fund.

Mobility Fund Phase I support will be awarded through a nationwide reverse auction to determine the entities that

would receive support and the amount of support they would receive. For Phase I of the Mobility Fund, the Commission will provide up to \$300 million in one-time support to immediately accelerate deployment of networks for mobile broadband services in unserved areas.

The Commission also established a separate and complementary one-time Tribal Mobility Fund Phase I to ward up to \$50 million in additional universal service funding to Tribal Areas, including Alaska, to accelerate mobile broadband availability in these remote and underserved areas. The goal of Mobility Fund Phase I is to extend the availability of mobile voice service on networks that provide 3G or better performance and to accelerate the deployment of 4G wireless networks in areas where it is cost effective to do so with one-time support. Winning bidders that elect to provide supported services over 3G networks will have two years to meet their requirements and those that elect to deploy 4G networks will have three years and will receive three disbursements of support during the two or three year period.
