

7. What are the key research gaps in the diagnostic approach for gestational diabetes mellitus?

An evidence report on GDM was prepared through the Agency for Healthcare Research and Quality's Evidence-based Practice Centers program and this Consensus Development Conference will be held on March 4–6, 2013.

During the conference, invited experts, including the authors of the evidence report, will present scientific data. Attendees will have opportunities to ask questions and provide comments during open discussion periods. After weighing the evidence, an unbiased, independent panel will prepare and present a consensus statement addressing the key questions. The statement will be widely disseminated to practitioners, policymakers, patients, researchers, the general public, and the media.

Please Note: As part of the NIH's measures to ensure the safety of employees and property, all visitors must be prepared to show a photo ID upon request. Visitors may be required to pass through a metal detector and have bags, backpacks, or purses inspected or x-rayed as they enter NIH buildings. For more information about the security measures at NIH, please visit the Web site at <http://www.nih.gov/about/visitorsecurity.htm>.
