Therefore, in accordance with section 706(a) of the Act, the Department will direct U.S. Customs and Border Protection (CBP) to assess, upon further instruction by the Department, countervailing duties equal to the amounts listed below for all relevant entries of washers from Korea. These countervailing duties will be assessed on unliquidated entries of washers from Korea entered, or withdrawn from warehouse, for consumption on or after June 5, 2012, the date of publication of the preliminary determination,¹⁰ and before October 3, 2012, the date on which the Department instructed CBP to discontinue the suspension of liquidation in accordance with section 703(d) of the Act. Entries of washing machines from Korea made on or after October 3, 2012, and prior to the date of publication of the ITC's final determination in the **Federal Register** are not liable for the assessment of countervailing duties, due to the Department's discontinuation, effective October 3, 2012, of the suspension of liquidation.

Suspension of Liquidation

In accordance with section 706 of the Act, we will direct CBP to reinstitute the suspension of liquidation on all relevant

entries of washers from Korea. We will also instruct CBP to require cash deposits equal to the amounts indicated below. These instructions suspending liquidation will remain in effect until further notice. Accordingly, effective the date of publication of the ITC's final affirmative injury determination, CBP will require, at the same time as importers would normally deposit estimated duties on this subject merchandise, cash deposits equal to the amounts indicated below:¹¹

SUPPLEMENTARY INFORMATION:

I. Abstract

This request is for extension of a current information collection.

Fishery quotas are established for many species in the fishery management plans developed by both the Gulf of Mexico Reef Fish Fishery Management Council and the South Atlantic Fishery

Management Council. The Southeast Fisheries Science Center has been delegated the responsibility to monitor these quotas. To do so in a timely manner, seafood dealers that handle these species are required to report the purchases (landings) of these species. The frequency of these reporting requirements varies depending on the magnitude of the quota (e.g., lower quota usually require more frequent reporting) and the intensity of fishing effort. The most common reporting frequency is twice a month; however, some fishery quotas, (e.g., the mackerel gill net) necessitate weekly or by the trip reporting.

In addition, information collection included in this family of forms includes interview with fishermen to gather information on the fishing effort, location and type of gear used on individual trips. This data collection is conducted for a subsample of the fishing trips and vessel/trips in selected commercial fisheries in the Southeast region. Fishing trips and individuals are selected at random to provide a viable statistical sample. These data are used for scientific analyses that support critical conservation and management decisions made by national and international fishery management organizations.

II. Method of Collection
