SUPPLEMENTARY INFORMATION:**A. Purpose**

Per FAR 47.208, military (and, as required, civilian agency) storage and distribution points, depots, and other receiving activities require advance notice of shipments en-route from contractors' plants. Generally, this notification is required only for classified material; sensitive, controlled, and certain other protected material; explosives, and some other hazardous materials; selected shipments requiring movement control; or minimum carload or truckload shipments. It facilitates arrangements for transportation control, labor, space, and use of materials handling equipment at destination. Also, timely receipt of notices by the consignee transportation office precludes the incurring of demurrage and vehicle detention charges. Unless otherwise directed by a contracting officer, a contractor shall send the notice to the consignee transportation office at least twenty-four hours before the arrival of the shipment.

B. Annual Reporting Burden

There is no centralized database in the Federal Government that maintains information regarding advance notice of shipments of classified material; sensitive, controlled, and certain other protected material; explosives, and some other hazardous materials; selected shipments requiring movement control; or minimum carload or truckload shipments en-route from contractor's plants. No public comments were received in prior years that have challenged the validity of the Government's estimates. Based on the number of unique vendors awarded contracts for Fiscal Year 2011 in the Federal Procurement Data System, the estimated respondents required to

submit the Report of Shipment notice make up less than one-quarter percent of the total number unique vendors awarded contracts. Additionally, consultation with Government subject matter experts did not yield information to warrant a revision to the estimate. The estimated annual reporting burden remains unchanged.

Respondents: 250.

Responses per Respondent: 4.

Annual Responses: 1,000.

Hours per Response: 167.

Total Burden Hours: 167.

Obtaining Copies of Proposals:

Requesters may obtain a copy of the information collection documents from the General Services Administration, Regulatory Secretariat (MVCB), 1275 First Street NE., Washington, DC 20417, telephone (202) 501-4755. Please cite OMB Control No. 9000-0056, Report of Shipment, in all correspondence.

Dated: February 13, 2013.

William Clark,

Acting Director, Federal Acquisition Policy Division, Office of Governmentwide Acquisition Policy, Office of Acquisition Policy, Office of Governmentwide Policy.

Proposed Project

Evaluation of Dating Matters: Strategies to Promote Healthy Teen Relationships™ (OMB# 0920-0941, Expiration 06/30/2015)—REVISION—National Center for Injury Prevention and Control (NCIPC)—Centers for Disease Control and Prevention (CDC).

Background and Brief Description

Dating Matters: Strategies to Promote Healthy Teen Relationships™ is the Centers for Disease Control and Prevention's new teen dating violence prevention initiative.

To address the gaps in research and practice, CDC has developed Dating Matters, teen dating violence prevention program that includes programming for students, parents, educators, as well as policy development. Dating Matters is based on the current evidence about what works in prevention and focuses on high-risk, urban communities where participants include: Middle school students age 11 to 14 years; middle school parents; brand ambassadors; educators; school leadership; program implementers; community representatives; and local health department representatives in the following communities: Alameda County, California; Baltimore, Maryland; Broward County, Florida; and Chicago, Illinois.

The primary goal of this revision is to expand and add a limited number of instruments to the approved outcome and implementation evaluation of Dating Matters in the four metropolitan cities to determine its feasibility, cost, and effectiveness. In the evaluation, a standard model of TDV prevention (Safe Dates administered in 8th grade) will be compared to a comprehensive model (programs administered in 6th, 7th, and 8th grade as well as parent, educator, policy, and communications interventions).

The current revision request has two aims:

- (1) Request to revise follow-up outcome evaluation instruments and drop mid-year outcome evaluation student survey, and
- (2) Request to add process evaluation instruments to enhance implementation.

Population. The study population includes students in 6th, 7th and 8th grades at 44 schools in the four participating sites. At most, schools are expected to have 6 classrooms per grade, with an average of 30 students per classroom yielding a population of 23,760 students (44 schools × 3 grades × 6 classrooms per grade × 30 students per classroom). All student evaluation activities will take place during the school year. The sampling frame for parents, given that we would only include one parent per student, is also 23,760 for the three years of data collection covered by this package. If we assume 40 educators per school, the sampling frame for the educator sample is 1,760.

Students: In each year of data collection, we will recruit 11,880 students (30 students per classroom × 3 classrooms per grade × 3 grades × 44 schools). We assume a 95% participation rate (n = 11,286) for the baseline student survey and 90% participation rate (n = 10,692) at follow-up survey. In this revision, we request to drop the mid-term survey to reduce burden on schools.

Parents: We will recruit a sample of 2,020 parents. We expect that 95% of the 2,020 parents will agree to participate at baseline (n = 1,919) and 90% will participate in the follow-up survey (n = 1,818) parents.

Educators: We will attempt to recruit all educators in each school (44 schools × 40 educators per school = 1,760). We expect a 95% participation rate for an estimated sample of 1,672 educators at baseline and 90% participation rate at follow-up for an estimated sample of 1,584.

School data extractors: We will attempt to recruit one data extractor per 44 schools to extract school data to be used in conjunction with the outcome data for the students. Data extractors in each school will access individual school-level data for those students in their school who consented and participated in the baseline student survey (3 × 4 × 30 × 95% = 342).

Implementation Evaluation

For the student focus groups, we will recruit groups of 10 students per group. Two groups will be held per each of the 4 sites (10 × 2 × 4 = 80 total student participants).

Student implementer focus groups will be organized by site, with two annual focus groups per site with 10 implementers in each group (10 × 2 × 4 = 80 total student program implementer participants).

Communications focus groups will be organized by site with up to four groups
