SUPPLEMENTARY INFORMATION: The U.S. Department of Energy (DOE) is in the process of developing a targeted research and development roadmap to address grid challenges that will help guide investments over the next five years. Accordingly, DOE is compiling key reference material and input from a very broad scope of stakeholders from across all sectors of the electricity grid. This process entails convening workshops and leveraging reference material regarding various aspects of the grid—including (but not limited to) smart grid, energy storage, cyber security, advanced computation—and investigating integration issues within the transmission and distribution systems.

Each of the discussion summary documents is the product of separate workshops hosted by the DOE's Grid Tech Team (GTT). Each workshop was posted publicly online and announced through outreach to stakeholders across various sectors of the industry. The intent was to encourage participation by the broadest scope of stakeholders as possible. The Distribution Workshop was held on September 24-26, 2012; the Transmission Workshop took place on November 1-2, 2012. The workshops were held at separate conference facilities in Arlington, Virginia. The discussion summary documents can be found online at: www.energy.gov/doegridtechteam (click on the corresponding link under the GTT Workshops header).
