

The basic structure of the workshops had all the attendees participate in breakout sessions, whereby smaller groups considered particular topics. The underlying purpose of both workshops was not to build consensus among stakeholders, but rather to gather information based on the individual experiences and expertise of the participants relating to the challenges and opportunities facing the electricity distribution and transmission systems. The GTT took all the information from the breakout sessions and synthesized the common themes into the Discussion Summary documents that are hereby available for review and open for comments.

The discussion summary documents will be valuable additions to the growing body of relevant reference material. Thus, the summaries of these workshop discussions, including consideration of public comments, will provide a key resource to help DOE guide its R&D investments in the near term.

DOE intends to finalize and make publically available these documents with consideration of comments received. Comments are invited on all aspects of the workshop topics, although DOE is primarily seeking answers to the following questions:

- i. Are there any issues in the discussion summary documents that require particular consideration? Are there any issues in the discussion summary documents that do not warrant further consideration? Please provide any examples or information that further supports your comment.
- ii. Are there crucial challenges or opportunities associated with the Electricity Distribution or Transmission System (or both) that are not sufficiently represented in these documents?

The Department of Energy will review all timely written responses to this notice. DOE intends to finalize and make available the Electricity Distribution and Transmission Workshop Discussion Summary reports.

Issued in Washington, DC on February 14, 2013.
