[Docket No. CP13-79-000]

#### Equitrans, L.P. Notice of Request Under Blanket Authorization

Take notice that on February 12, 2013, Equitrans, L.P. (Equitrans), pursuant to the blanket certificate authorization

granted in Docket No. CP96-532-000,<sup>1</sup> filed an application in accordance to sections 157.205, 157.208(c), and 157(210) of the Commission's Regulations under the Natural Gas Act (NGA) as amended, to construct, own, operate, and maintain its Low Pressure East Upgrade Project (Project) in Allegheny, Washington, and Greene Counties, Pennsylvania. Equitrans proposes to replace and pressure test certain portions of its H-129, H-128, and H-111 pipelines and to retest the H-101 pipeline. The replacement and retest of pipelines will result in an increase in Maximum Allowable Operating Pressure (MAOP). The proposed Project will allow for more flexibility for Equitrans' customers to better serve Pittsburgh and surrounding markets, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Equitrans proposes to replace approximately 4.91 miles of pipe and to pressure test 10.10 miles of existing pipeline to better maintain system integrity and operational reliability. In addition, launchers and receivers will be installed on the facilities, which will make the line capable of in-line inspections for integrity purposes with out disruption to customer service. Also, Equitrans proposes to upgrade interconnects, meter taps, and appurtenant facilities along its system in Allegheny, Washington, and Greene Counties, Pennsylvania. As a result of the proposed Project, the MAOP of the Project will increase from about 216 psig to 655 psig, except for a small portion of the H-111 line which will be increased to an MAOP of 546 psig. Increasing the MAOP will position Equitrans to be able to receive gas in the future from high-pressure production wells located in the Marcellus Shale Play. Equitrans anticipates that work on all pipeline replacement and retest activities will be performed within previously disturbed areas used during the original installation of the pipeline facilities. A 75-foot temporary construction right-of-way that includes the existing right-of-way will be used during construction of the Project. Equitrans estimates that the cost of the Project will be approximately \$29,407,261. The projected in-service date of the Project is November 1, 2013.

Any questions concerning this application may be directed to Paul W. Diehl, Senior Counsel—Midstream EQT Corporation, 625 Liberty Avenue, Suite 1700, Pittsburgh, PA 15222, (412) 395-5540, or email at [PDiehl@eqt.com](mailto:PDiehl@eqt.com).

During a May 2006 dam safety inspection, Commission staff found that the project stopped operating sometime after 2003.

Commission staff inspected the project again in March 2009 and in August 2012. The exemptee did not provide a project representative during either of these inspections. The Commission attempted to contact the exemptee, requiring a plan and schedule to resume operation; the exemptee did not respond.

In November 2012, and again in January 2013, the Commission sent letters requiring the exemptee to file a plan and schedule to restore project operation or an application to surrender the project. The letter stated that the Commission would begin an implied surrender process if the plan was not filed. To date, the exemptee has not filed a response and the project remains inoperable.
