BILLING CODE 6717-01-P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. CP13-64-000]

Gulf Crossing Pipeline Company LLC; Notice of Intent To Prepare an Environmental Assessment for the Proposed Panda Power Lateral Project and Request for Comments on Environmental Issues

The staff of the Federal Energy Regulatory Commission (FERC or Commission) will prepare an environmental assessment (EA) that will discuss the environmental impacts of the Panda Power Lateral Project involving construction and operation of facilities by Gulf Crossing Pipeline Company LLC (Gulf Crossing) in Grayson County, Texas. The Commission will use this EA in its decision-making process to determine

whether the project is in the public convenience and necessity.

This notice announces the opening of the scoping process the Commission will use to gather input from the public and interested agencies on the project. Your input will help the Commission staff determine what issues they need to evaluate in the EA. Please note that the scoping period will close on April 3, 2013.

This notice is being sent to the Commission's current environmental mailing list for this project. State and local government representatives should notify their constituents of this proposed project and encourage them to comment on their areas of concern.

If you are a landowner receiving this notice, a pipeline company representative may contact you about the acquisition of an easement to construct, operate, and maintain the proposed facilities. The company would seek to negotiate a mutually acceptable agreement. However, if the Commission approves the project, that approval conveys with it the right of eminent domain. Therefore, if easement negotiations fail to produce an agreement, the pipeline company could initiate condemnation proceedings where compensation would be determined in accordance with state law.

Gulf Crossing provided landowners with a fact sheet prepared by the FERC entitled "An Interstate Natural Gas Facility On My Land? What Do I Need To Know?". This fact sheet addresses a number of typically-asked questions, including the use of eminent domain and how to participate in the Commission's proceedings. It is also available for viewing on the FERC Web site (www.ferc.gov).

Summary of the Proposed Project

Gulf Crossing proposes to construct and operate a new pipeline lateral along with metering, interconnect, and pigging facilities north of Dallas, Texas in Grayson County, Texas. The Panda Power Lateral would provide 125,000 dekatherms per day of deliverable natural gas capacity from its takeoff at the Sherman Compressor Station located 10 miles northeast of Sherman, Texas, to Panda Sherman Power, LLC's Panda Sherman Power Plant I electric generation power plant, currently under construction on the south side of Sherman, Texas. According to Gulf Crossing, its project would help meet the increasing demands for electricity in the expanding market area of north central Texas.

The Panda Power Lateral Project (Project) would consist of the following facilities:

- A 16.5-mile-long 16-inch-diameter pipeline lateral;
- A pig launcher barrel and system tie-in facilities at Milepost (MP) 0.0 consisting of a 16-inch launcher barrel and associated piping and valves;¹
- Two mainline valves and appurtenant facilities at MPs 8.74 and 14.76;
- A pig receiver barrel and meter station consisting of a 16-inch receiver barrel and associated piping and valves at MP 16.52; and
- An Enterprise Texas Pipeline (ETP) interconnect at MP 14.75 consisting of a meter and flow control station to be built, owned, and operated by ETP.

The general location of the project facilities is shown in appendix 1.²

Land Requirements for Construction

Construction of the proposed facilities would require disturbance of 271 acres of land. This total would include 158 acres of temporary right-of-way that would be fully restored to original use, and 113 acres of new permanent right-of-way required for the pipeline, appurtenant facilities, and access roads. Eleven of the 29 access roads to be used for construction would be new, five would be temporary, and only two of the proposed 24 permanent access roads would require improvements beyond a gravel or dirt surface. Some of the access roads All the access roads The temporary right-of-way would be comprised of 81 acres of nominal workspace along the pipeline, 38 acres of temporary additional workspaces along the pipeline, and 36 acres of contractor yards. Gulf Crossing would use a typical construction right-of-way width of 75 to 100 feet and a permanent right-of-way width of 50 feet. About 55 percent of the proposed pipelines would parallel existing pipeline, electric, and sewer utility rights-of-way.

The EA Process

The National Environmental Policy Act (NEPA) requires the Commission to take into account the environmental impacts that could result from an action

¹ A "pig" is a tool that the pipeline company inserts into and pushes through the pipeline for cleaning the pipeline, conducting internal inspections, or other purposes.

² The appendices referenced in this notice will not appear in the **Federal Register**. Copies of appendices were sent to all those receiving this notice in the mail and are available at www.ferc.gov using the link called "eLibrary" or from the Commission's Public Reference Room, 888 First Street NE., Washington, DC 20426, or call (202) 502-8371. For instructions on connecting to eLibrary, refer to the last page of this notice.
