Approval and Promulgation of Air Quality Implementation Plans; Indiana; Consent Decree Requirements

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: EPA is proposing to approve a portion of Indiana's construction

permit rule for sources subject to the state operating permit program regulations at 40 CFR part 70. These provisions authorize the state to incorporate terms from Federal consent decrees or Federal district court orders into these construction permits. EPA is also approving public notice requirements for these permit actions. These rules will help streamline the process for making Federal consent decree and Federal district court order requirements permanent and Federally enforceable.

SUPPLEMENTARY INFORMATION: In the Final Rules section of this **Federal Register**, EPA is approving the State's SIP submittal as a direct final rule without prior proposal because the Agency views this as a noncontroversial submittal and anticipates no adverse comments. A detailed rationale for the approval is set forth in the direct final rule. If no adverse comments are received in response to this rule, no

further activity is contemplated. If EPA receives adverse comments, the direct final rule will be withdrawn and all public comments received will be addressed in a subsequent final rule based on this proposed rule. EPA will not institute a second comment period. Any parties interested in commenting on this action should do so at this time. Please note that if EPA receives adverse comment on an amendment, paragraph, or section of this rule and if that provision may be severed from the remainder of the rule, EPA may adopt as final those provisions of the rule that are not the subject of an adverse comment. Approval and Promulgation of Air Quality Implementation Plans; West Virginia; Prevention of Significant Deterioration

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: EPA is proposing to disapprove a narrow portion of a State Implementation Plan (SIP) revision submitted by the State of West Virginia on August 31, 2011. EPA is proposing this action because a narrow portion of the submittal does not satisfy the Federal requirement for the inclusion of condensable emissions of particulate matter (condensables) within the definition of "regulated new source review (NSR) pollutant." Additionally, because West Virginia's August 31, 2011 SIP revision does not adequately account for condensable emissions within the definition of "regulated NSR pollutant," EPA is also proposing to disapprove specific Prevention of Significant Deterioration (PSD) portions of related infrastructure submissions required by the Clean Air Act (CAA) to implement, maintain, and enforce the 1997 fine particulate matter (PM_{2.5}) and ozone National Ambient Air Quality Standards (NAAQS), the 2006 PM_{2.5} NAAQS, and the 2008 lead and ozone
