Laminate Description and performance:

Bonded laminate with durable water repellency (air permeability maximum 1.5 per ASTM D737)

NOTE (ranges): Ranges in these specifications reflect a tolerance from the target figures of up to three percent for fiber content, yarn size, and thread count; up to ten percent for weight; and up to five centimeters (two inches) for width.

NOTE (processing variations): The yarn size designations describe a range of yarn specifications for yarn before knitting, dyeing and finishing of the fabric. They are intended as specifications to be followed by the mill in sourcing yarn used to produce the fabric. Dyeing, finishing, and knitting can alter the characteristic of the yarn as it appears in the finished fabric. These specifications therefore include yarns appearing in the finished fabric as finer or coarser than the designated yarn sizes provided that the variation occurs after processing of the greige yarn and production of the fabric. The specifications for the fabric apply to the fabric itself prior to cutting and sewing of the finished garment. Such processing may alter the measurements.
