BILLING CODE 4510-28-P

LIBRARY OF CONGRESS

U.S. Copyright Office

[Docket No. 2013-2]

Technological Upgrades to Registration and Recordation Functions

AGENCY: U.S. Copyright Office, Library of Congress.

ACTION: Notice of Inquiry.

SUMMARY: The United States Copyright Office (hereinafter Copyright Office or Office) is in the process of identifying and evaluating potential improvements and technical enhancements to the information technology platforms that support its registration and recordation functions, including its online registration system. These efforts are part of the Office's ongoing special projects, commenced October 25, 2011 (available at the Office's Web site at www.copyright.gov/docs/priorities.pdf). The information garnered through this process has and will continue to inform the development of the Copyright Office's long-term strategic plan, scheduled to commence in October 2013.

At this time, the Office seeks comments regarding existing capabilities and future possibilities. Broadly, the Office seeks comments on (1) how stakeholders use the current online offerings of the Copyright Office, especially with respect to registration and recorded documents, and how the current offerings meet, fail to meet, or

exceed user expectations; and (2) how stakeholders would like to interact with the Copyright Office electronically in the future, or, put differently, what online services, or aspects of existing online services stakeholders would like to see. The Office appreciates the comments and suggestions of those who use the national registration and recordation systems to protect their intellectual property, as well as those who regularly use Copyright Office resources to identify copyright owners, investigate the copyright status of works and the public domain, and perform other research, including statistical analysis on aggregated data sets.

DATES: Comments on the Notice of Inquiry and Requests for Comments are due on or before May 21, 2013.

Submission: All comments shall be submitted electronically. A comment page containing a comment form is posted on the Copyright Office Web site at http://www.copyright.gov/docs/technical_upgrades. The Web site interface requires submitters to complete a form specifying name and organization, as applicable, and to upload comments as an attachment via a browse button. To meet accessibility standards, all comments must be uploaded in a single file in either the Portable Document File (PDF) format that contains searchable, *accessible* text (not an image); Microsoft Word; WordPerfect; Rich Text Format (RTF); or ASCII text file format (not a scanned document). The maximum file size is 6 megabytes (MB). The name of the submitter and organization should appear on both the form and the face of the comments. All comments will be posted publicly on the Copyright Office web site exactly as they are received, along with names and organizations. If electronic submission of comments is not feasible, please contact the Copyright Office at 202-707-8350 for special instructions.

Reed, Senior Advisor for Policy & Special Projects, Office of the Register of Copyrights, by email at creed@loc.gov; or call the U.S. Copyright Office by phone at 202-707-8350.

SUPPLEMENTARY INFORMATION:

I. Background

In 2000, the Copyright Office initiated a comprehensive business process reengineering initiative intended to update the Office's technology platform and improve operational efficiency. With the assistance of outside

consultants and business analysts, the Office identified opportunities for efficiency enhancements and process improvements. The most significant recommendation was to convert the existing paper-based copyright registration system to an electronic system, which included the development of related new business processes and the automated production of public copyright records.

Funding available for the reengineering effort was limited and decisions made by the Copyright Office and the greater Library were necessarily constrained. Ultimately the Office implemented a commercial off-the-shelf software package. The Office piloted the internal business process functions of the software with a subset of constituents in February 2005, followed by full implementation of the Copyright Office's electronic processing system in August 2007. The public-facing electronic registration system—the system that enables copyright registration applicants to submit materials online—was launched in July 2008. The Office implemented a significant upgrade to its software and hardware platforms in August 2010, and implemented periodic upgrades and enhancements to accommodate the needs of the system's stakeholders—namely those that submit materials for registration, those that search the Copyright Office database for copyright ownership information, and the Copyright Office's staff that process and examine copyright claims.

Today, more than eighty percent of the Office's applications for copyright registration come through the electronic system, demonstrating the copyright community's widespread interest in electronic registration functions. Although the current system, and the periodic upgrades and enhancements, have allowed the Office to maintain a functional electronic platform for many types of works, there is room for substantial improvement. Notably, the Office's recordation services were included in the initial reengineering plan, but were later dropped for budgetary reasons. Recordation processes are, thus, still paper-based and are a top concern of the Copyright Office. Thus, the Office's current systems represent the "first generation" of the Office's electronic processing capabilities.

II. Discussion

In recent months, project leaders from the Copyright Office have engaged copyright owners, users of copyright records, technical experts, public interest organizations, and lawyers,
