SUPPLEMENTARY INFORMATION:

I. Abstract

In 1976, the NPS initiated a backcountry registration system in accordance with the regulations found at 36 CFR 1.5, 1.6 and 2.10. The objective of the use permit system is to provide users access to backcountry areas of national parks with continuing opportunities for solitude, while enhancing resource protection and providing a means of disseminating public safety messages regarding the backcountry travel. NPS backcountry program managers, by designating access routes and overnight camping locations, can redistribute campers in response to user impact, high fire danger, flood or wind hazard, bear activity or other situations that may temporarily close a portion of the backcountry. The NPS may also use the permit system as a means of ensuring that each backcountry user receives up-to-date information on backcountry sanitation procedures, food storage, wildlife activity, trail conditions and weather projections so that concerns for visitor safety are met.

The Backcountry Use Permit is an extension of the NPS statutory authority responsibility to protect the park areas it administers and to manage the public use thereof (16 U.S.C. 1 and 3). NPS regulations codified in 36 CFR parts 1 through 7, 12 and 13 are designated to implement statutory mandates that provide for resource protection and public enjoyment. The Backcountry Use Permit is the primary form used to provide access into NPS backcountry areas including those areas that require a reservation to enter where use limits are imposed in accordance with other NPS regulations. Such permitting

enhances the ability to the NPS to education users on potential hazards, search and rescue efforts, and resource protection.
