SUPPLEMENTARY INFORMATION:

Title: Microbusiness, Innovation, Science & Technology Survey.

OMB Approval Number: 3145-New.

Expiration Date: Not applicable.

Overview of This Information Collection

The National Center for Science and Engineering Statistics (NCSES) of the National Science Foundation (NSF) plans to conduct a pilot of the new Microbusiness Innovation Science & Technology (MIST) Survey. MIST will collect R&D and other innovation-related data from small, independent U.S. microbusinesses with fewer than five employees. In addition to general information—primary business activity, year business was formed, and number of employees—this survey will collect the following:

- Business data on R&D activity and funding,
- Number of employees and R&D employees,
- Sales of goods and services,
- Operating agreements and licensing activities with universities, other businesses, and government agencies (federal, state, and local),
- Experience with several forms of technology transfer,
- Use and importance of patents and other forms of intellectual property,
- Sources of technical knowledge, and
- Demographic and entrepreneurial characteristics of the business owner.

Consult With Other Agencies & the Public

NSF has consulted with other agencies and has not found another project similar in scope. A request for public comments will be solicited through announcement of data collection in the **Federal Register**.

Background

NCSES is broadly tasked with measuring the role of science and technology (S&T) in the United States' economy and abroad. A major component of this activity is its sponsorship of the Business Research and Development (R&D) Innovation Survey (BRDIS), which collects information annually on research and development and related activities performed within the United States by industrial firms. In 2004 the National Academy of Sciences' Committee on National Statistics (CNSTAT) reviewed NSF's portfolio of R&D surveys and recommended that NSF explore ways to measure firm innovation and investigate the incidence of R&D activities in growing sectors, such as small business enterprises, not currently covered by BRDIS. BRDIS collects information annually on research and development and related activities performed within the United States by industrial firms. However, businesses with fewer than five employees are excluded from this survey. MIST will fill that void.

Respondents: Establishments (Typically owners or senior level managers of microbusinesses).

Number of Principal Investigator Respondents: 1,600.

Burden on the Public: 400 total hours.

Dated: April 4, 2013.

Suzanne H. Plimpton,

Reports Clearance Officer, National Science Foundation.
