Federal Aviation Administration

Agency Information Collection Activities: Requests for Comments; Clearance of New Approval of Information Collection: Critical Parts for Airplane Propellers

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice and request for comments.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, FAA invites public comments about our intention to request the Office of Management and Budget (OMB) approval for a new information collection. The **Federal Register** Notice with a 60-day comment period soliciting

comments on the following collection of information was published on January 28, 2013, vol. 78, no. 18, pages 5859-5860. The Federal Aviation Administration (FAA) is amending the airworthiness standards for airplane propellers. This action will define what a propeller critical part is, require the identification of propeller critical parts by the manufacturer, and establish engineering, manufacture, and maintenance processes for those parts. These processes will be required to be recorded and maintained within company manuals. The intended effect of this rule is to ensure the continued airworthiness of propeller critical parts by requiring a system of processes to identify and manage these parts throughout their service life. Adopting this rule will eliminate regulatory differences between part 35 and European Aviation Safety Agency (EASA) propeller critical parts requirements, thereby simplifying airworthiness approvals for exports.

DATES: Written comments should be submitted by June 11, 2013.

FOR FURTHER INFORMATION CONTACT: Kathy DePaepe at (405) 954-9362, or by email at: Kathy.A.DePaepe@faa.gov.

SUPPLEMENTARY INFORMATION:

OMB Control Number: 2120-XXXX.

Title: Critical Parts for Airplane Propellers.

Form Numbers: There are no forms associated with this information collection activity.

Type of Review: Clearance of a new information collection.

Background: On December 1, 2011, FAA published a notice of proposed rulemaking titled "Critical Parts for Airplane Propellers" (76 FR 74749). This activity contains new Paperwork Reduction Act recordkeeping requirements that were not addressed in that notice of proposed rulemaking, and which are addressed here. The rule will require that U.S. companies who manufacture critical parts for airplane propellers update their manuals to record engineering, manufacture, and maintenance processes for propeller critical parts. The required manual updates will be used by the propeller manufacturer to show compliance with the propeller critical parts requirements. There are currently three U.S. companies who will be required to revise their manuals to include these processes.

Respondents: Three manufacturers.

Frequency: This is a one time requirement.

Estimated Average Burden per

Response: 40 hours.

Estimated Total Annual Burden: 120 hours.

ADDRESSES: Interested persons are invited to submit written comments on the proposed information collection to the Office of Information and Regulatory Affairs, Office of Management and Budget.
