

and training. To accomplish this objective and achieve its overall safety goals, the ACS documents support the safety management system (SMS) framework. SMS methodology provides a systematic approach to achieving acceptable levels of safety risk. The ATSTWG is constructing ACS, associated guidance, and test item bank question components of the airman certification system around the four functional components of SMS:

- *Safety Policy* that demonstrates FAA senior management commitment to continually improve safety through enhancements to the airman certification testing and training system; specifically, better integration of the aeronautical knowledge, flight proficiency, and risk management components of the airman certification system;

- *Safety Risk Management* processes that create a structured means of safety risk management decision making to identify, assess, and determine acceptable level of risk associated with regulatory changes, safety recommendations, or other factors requiring modification of airman testing and training materials;

- *Safety Assurance* processes which allow increased confidence on the part of industry and FAA stakeholders in risk controls through a continual review of FAA products and the systematic, prompt and appropriate incorporation of changes arising from new regulations, data analysis, and safety recommendations; and

- *Safety Promotion* framework to support a positive safety culture in the form of training and ongoing engagement with both external stakeholders (e.g., the aviation training industry) and FAA policy divisions.

Given the foundational nature of the ACS documents and their importance in the ongoing evolution of the FAA's airman certification testing and training system, the ATSTWG wishes to make draft ACS documents for the private pilot certificate and the instrument rating available to the public for review and comment. The ATSTWG will use the comments it receives to refine and inform its continuing work on this project. Future drafts developed by the ATSTWG may also be published for this purpose.

#### Furlough Implementation

**AGENCY:** Federal Aviation Administration (FAA), DOT.

**ACTION:** Notice.

**SUMMARY:** This action gives notice to the American public and aviation industry of the FAA's Aviation Safety Office's (AVS) furlough implementation. Under the Balanced Budget and Emergency Deficit Control Act of 1985, as amended by the Budget Control Act of 2011 and the American Taxpayer Relief Act of 2012, across-the-board budget cuts require the FAA to implement furloughs. AVS and its Services/Offices will implement the required 11 days of furlough beginning April 21, 2013 and continuing through September 30, 2013. AVS will continue to focus resources on those initiatives that would have the highest safety and economic value for the American public and aviation industry. The furlough days vary, with each office scheduling those days in accordance with mission requirements, workload considerations, and applicable collective bargaining agreements. For specific information, please see the FAA Web site at [http://www.faa.gov/about/office\\_org/headquarters\\_offices/avs/operations\\_sequestration](http://www.faa.gov/about/office_org/headquarters_offices/avs/operations_sequestration).

**DATES:** The furlough will take place beginning April 21 through September 30, 2013.

**SUPPLEMENTARY INFORMATION:** For specific information, please see the FAA Web site at [http://www.faa.gov/about/office\\_org/headquarters\\_offices/avs/operations\\_sequestration](http://www.faa.gov/about/office_org/headquarters_offices/avs/operations_sequestration).
